Understanding Islamic Financial Services Karim Ullah, Wafi Al-Karaghoul, 2017-04-03

WINNER The HEC Outstanding Research Award 2019

Understanding Islamic Financial Services offers fresh insights on the Islamic financial system. The importance of this system cannot be underestimated. Experts expect that it is likely to sustain double digit growth globally over the next few years and demand for professionals in the area has never been higher both in the UK and around the world. While other texts on the subject look at the basic concepts, principles, contracts and financial products used in Islamic banking and finance, Understanding Islamic Financial Services goes one step further and provides a new context identifying four levels on which the Islamic Financial system operates: product level, institution level, market level and inter market level. It considers Islamic banking and finance as a multi level service system, an approach which will enable students and professionals of Islamic finance to gain a more in depth holistic understanding of how the system functions. Understanding Islamic Financial Services covers contemporary developments in service science e.g. service theories, service visualization tools and service co creation concepts and implications for the development and sustainability of Islamic financial services. Examples from practice enliven the text and allow the reader to relate the theories and principles discussed to current practice.

The Engaged University David Watson, Robert Hollister, Susan E. Stroud, Elizabeth Babcock, 2011-07-15

The Engaged University is a comprehensive empirical account of the global civic engagement movement in higher education. In universities around the world something extraordinary is underway. Mobilizing their human and intellectual resources, institutions of higher education are directly tackling community problems, combating poverty, improving public health and restoring environmental quality. This book documents and analyzes this exciting trend through studies of civic engagement and social responsibility at twenty institutions worldwide. This timely volume offers three special contributions to the literature on higher education policy and practice: a historical overview of the founding purposes of universities which almost invariably included a context specific element of social purpose together with a survey of how these founding intentions have fared in different systems of higher education; a contemporary account of the policy and practice of universities all over the world seeking to re engage with this social purpose; and an overview of generic issues which emerge for the engaged university.

Moazzam Farooq,Sajjad Zaheer,2015-02-26 Rapid growth of Islamic banking in developing countries is accompanied with claims about its relative resilience to financial crises as compared to conventional banking However little empirical evidence is available to support such claims Using data from Pakistan where Islamic and conventional banks co exist we compare these banks during a financial panic Our results show that Islamic bank branches are less prone to deposit withdrawals during financial panics both unconditionally and after controlling for bank characteristics The Islamic branches of banks that have both Islamic and conventional operations tend to attract rather than lose deposits during panics which suggests a role for religious branding We also find that Islamic bank branches grant more loans during financial panics and that their lending decisions are less sensitive to changes in deposits Our findings suggest that greater financial inclusion of faith based groups may enhance the stability of the banking system **Statistics on Scheduled Banks in Pakistan**
