

## 2.6 ANALOGIES

Analogies, in a narrower sense, are a test of vocabulary. In a broader sense, however, they test the ability to see relationships between the meanings of words. First, a pair of words is given. These words are related to each other in a certain manner. You have to spot this relationship accurately and to identify, among the given words or word pairs, the ones that are similarly related. Thus :

### Example

TRUTH : FALSEHOOD :: VIRTUE : ?

(1) Goodness (2) Vice (3) Altruism (4) Veracity

### Answer

Here, you have to determine which of the given words has the same relationship to 'virtue', as 'truth' has to 'falsehood'. The surest way to do this is to first spot the relationship. Once you spot what the relationship is, (in this case, that of opposites) it becomes easy to note that the opposite of 'virtue' is (2) 'vice'. Do not read the alternatives till you have first determined the relationship between the capitalized pair.

### EXERCISE

For each question below, determine the relationship between the pair of words in the question and then select, from the options, the pair having a similar relationship to the first pair.

Glover,Royce R. Ronning,Cecil R. Reynolds,2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The

handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views
