guide for both the novice to prepar ative HPLC and as an aid to the chemical engineer planning to introduce this black art
into the industrial environment The first question to ask is What is preparative To many the isolation of a few grams of an
extremely potent molecule may be considered as largescale In some instances 50 g of a vaccine will supply the annual market
for a particular disease state In more traditional drug therapies a few tonne may be more typical The second question to be
answered is What is HPLC This abbreviation is often derived from the term High Performance Liquid Chromatography
though the term High Pressure Liquid Chromatography is often preferred since high performance can also be achieved at
low pressure Just to confuse the issue is this the pressure created by the resistance to liquid flow through the column or the
pressure at which the column is packed
