

YAMAHA WaveRunner

Wear a USCG approved Personal Flotation Device (PFD) suitable for PWC use. Never exceed capacity (see manual) or water in forced entry conditions (such as waves or splash) as a result of falling into water or being near jet thrust nozzle. Wear wet suit bottom or equivalent clothing (see Owner's Manual).

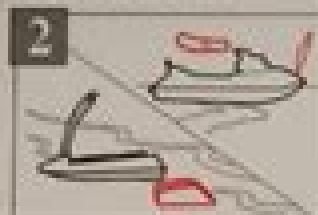

Attach engine shut off cord (kill switch) to wrist and keep it free of handlines so that the engine stops if the operator falls off. The engine will not start when the clip is removed from the engine shut off switch. After riding, remove cord from the PWC to avoid unauthorized use by children or others.

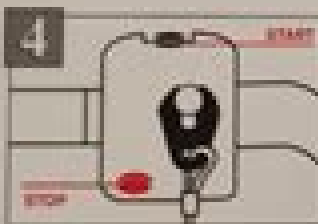

Engage the throttle lever to increase engine speed. Release the throttle lever to decrease engine speed or to return to the idle position. Always check throttle and steering controls for proper operation before starting engine.

Riding Instructions

Secure the engine compartment before each use. Do not start the engine if there is a fuel leak or a loose electrical connection.

Push the start switch (green button) to start the engine. Push the engine stop switch (red button) to stop the engine.

Steering control depends upon the combination of handline position and the amount of throttle. The amount of jet thrust, in addition to the position of the handline, determines how sharply you turn. Do not release throttle when turning to avoid severe loss of speed. (See Owner's Manual).
