Circular Business Models in the Mobile Phone Industry David Watson, Anja Charlotte Gylling, Naoko Tojo, Harald Throne-Holst, Bjørn Bauer, Leonidas Milios, 2017-11-30 The circular economy offers opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape making repair, refurbishment and resale attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector. **Fake Stuff** Yi-Chieh Jessica Lin, 2011-03-29 The Anthropology of Stuff is part of a new Series dedicated to innovative, unconventional ways to connect undergraduate students and their lived concerns about our social world to the power of social science ideas and evidence. Our goal with the project is to help spark social science imaginations and in doing so, new avenues for meaningful thought and action. Each Stuff title is a short 100 page mini text illuminating for students the network of people and activities that create their material world. Yi-Chieh Lin reveals how the entrepreneurial energy of emerging markets such as China includes the opportunity to profit from fake stuff that is counterfeit goods that rely on our fascination with brand names. Students will discover how the names and logos embroidered and printed on their own clothes carry their own price tag above and beyond the use value of the products themselves. The book provides a wonderful introduction for students to global markets and their role in determining how they function. *Achieving the Circular Economy* Jenny Palm, Nancy Bocken, 2021-05-20 Urbanisation and climate change are pushing cities to find novel pathways leading to a sustainable future. The urban context may be viewed as a new experimentation space to accelerate the transition to a circular economy. Urban symbiosis and the circular economy are emerging concepts attracting more and more attention within the urban context. Moreover, new business models are emerging around sharing and peer-to-peer practices which are challenging existing roles of actors in society. These developments are having an important impact on the flows of resources and the use of the city infrastructure and each research area has taken a different perspective in the analysis of such impacts. This Special Issue aims to explore what a circular city could constitute and how and why cities engage in circularity. This Special Issue includes seven high quality papers on the theories and practices of circular cities. Actors, concepts, methods, tools, the barriers to and enablers of circular cities are discussed and a solid base and inspiration for the future development of circular cities are provided. **The Great Indian Phone Book** Assa Doron, Robin Jeffrey, 2013-04-02 Over just a decade in India the mobile phone was transformed from a rare, unwieldy instrument to a palm-sized staple that even poor fishermen can
