Internecine David J. Schow, 2010-08-03 Smart scathing and verbally inventive to an astonishing degree David J Schow is one of the most interesting writers of his generation Peter Straub Inter what When advertising executive Conrad Maddox returns from a redeye flight and finds a mysterious locker key waiting in his rental car he discovers a briefcase loaded with guns and money Several hours later his entire life tumbles down a rabbit hole when he meets Dandine owner of the case and former contract assassin for a shadowy organization called Norco which is now out to nail both of them *Internecine* means conflict mutual destruction and slaughter or as Dandine tells Conrad they are now inadvertently at play in a field of terrorism counter assassination military coups dirty tricks Watergate spy vs spy murky secret organizations that sort of thing A world in which being innocent can't save you the police can't help you and your only hope of getting out alive is to risk unheard of dangers against opponents with nearly unlimited power To free themselves from the spider web of black ops murder madness and betrayal Dandine and Conrad must delve ever deeper into the spiraling dangerous maze that is Norco where everyone seems to be in on the most lethal of games except you

Leverage Data Streams for Better Operational

Decision-Making Christoph Prinz, 2023-05-31 Smart sustainable mobility ecosystems promise to address society's expectation of environmentally friendly on demand mobility While the technology stack to build such ecosystems is just around the corner in the form of connected automated and electric vehicles strategies to deploy and operate such fleets in a coordinated manner must still be advanced Most of such optimization challenges highly depend on the nature of customer demand vehicle supply and environmental influences Hence this dissertation investigates how available data streams from mobility ecosystems can be leveraged in Information Systems to solve related decision problems The overarching goal of this work is to generate design knowledge to improve vehicle availability provider profitability and environmental sustainability for such ecosystems Applying quantitative methods to real world data from shared vehicle systems generates insights into the nature of demand and supply Combining it with an analysis of empirical research on vehicle relocation algorithms builds the foundation for two artifact designs The first artifact enables the development and simulation based evaluation of operation modes for vehicle fleets The second artifact enables artificial intelligence based decision support for the vehicle rebalancing problem The insights are finally incorporated and generalized to a nascent design theory on data enabled operational decision making in the context of smart sustainable mobility environments The findings have multifaceted implications for researchers concerned with data enabled value creation in Green IS shared economy and smart mobility and business analytics and data science Furthermore guidance for fleet providers to improve system attractiveness and for society to experience the potential amount of vehicle access without personal ownership is provided
