higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable

solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Proceedings and List of Members* South African Chemical Institute,1913

Tourism and Hospitality for Sustainable Development Emmanuel Ndhlovu, Kaitano Dube, Tawanda Makuyana, 2024-09-12 The travel and hospitality industry in the 21st century cannot be conceived planned advertised run or researched without the use of digital technology and innovation

Sustainable development in this sector cannot be achieved without considering the Fourth Industrial Revolution. The use of technology not only enhances the industry's profitability but also helps it to respond effectively to pressing global sustainability issues such as pandemics, climate change, energy crises, workforce shortages, and hyperinflation. Furthermore, technology allows the sector to fully evaluate its current and future economic, social, and environmental impacts, addressing the needs of tourists, businesses, the environment, and destinations. However, implementing technology is not a simple process and involves various opportunities, costs, and challenges that differ depending on the geopolitical and socio-economic context. With the drive towards disability inclusion, digitalisation, technological innovations, and inventions can play a significant role in universal design and reasonable accommodation for older people and populations with disabilities in the Global North and South, such as forms of accessible tourism and hospitality. In the context of the above and in response to the thoughtful need for new and sustained study of the developments, interrelationships, potentialities of the topic, and synergies, this edited book explores the trends, opportunities, challenges, and complexities of digitalisation and technology integration in the tourism and hospitality industry, as well as strategic shifts that will contribute to emerging research streams. The book comprises contributions that generate theoretical insights, empirical findings, and evidence-based recommendations by focusing on emerging and forecasted technologies used in the tourism and hospitality industry, such as blockchains, robots, Artificial Intelligence, Virtual Reality, big data, and analytics. The aim is to provide a better understanding of how disruptive technologies and digitalisation are currently being utilised and how they currently and potentially influence various stakeholder groups, as well as their future possibilities and impossibilities. The third volume in a three-volume set primarily covers how these new technologies impact consumers and employees of tourism-related services.

Deanship in the Global South Oliver J.J. Seale, 2021-02-08. The university today is a postmodern, neo-liberal, competitive, boundary-less knowledge conglomerate, a far cry from its historical, traditional, classical, and collegial roots. There is a body of literature on deanship that points to its evolving nature in the contemporary academe, characterised by complexity and change. Balancing academic demands simultaneously with the requirements for effective performance, leadership, and management lies at the heart of this very challenging bridging role. Nowadays, Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems. Deans nowadays are required to be more than collegial intellectual leaders. They are also meant to be fiscal and human resource experts, fundraisers, politicians, and diplomats. *Deanship in the Global South: Bridging Troubled Waters* is about the deans' lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account. Their lack of preparation and inadequate support points to the need for a more strategic, integrated approach to leadership development within their critical bridging roles between the academe and administration.

Southern Resistance in Critical Perspective Marcel Paret, Carin Runciman, Luke Sinwell, 2017-03-27. From the Arab

Uprising to anti austerity protests in Europe and the US Occupy Movement to uprisings in Brazil and Turkey resistance from below is flourishing Whereas analysts have tended to look North in their analysis of the recent global protest wave this volume develops a Southern perspective through a deep engagement with the case of South Africa which has experienced widespread popular resistance for more than a decade Combining critical theoretical perspectives with extensive qualitative fieldwork and rich case studies Southern Resistance in Critical Perspective situates South Africa s contentious democracy in relation to both the economic insecurity of contemporary global capitalism and the constantly shifting political terrain of post apartheid nationalism The analysis integrates worker community and political party organizing into a broader narrative of resistance bridging historical divisions between social movement studies labor studies and political sociology **Online**

Teaching and Learning in Higher Education Mariam Akinlolu, Manyane Makua, Nomalungelo Ngubane, 2024-06-03 This edited volume explores current practices in African higher education during and post the global pandemic It fills a gap in the existing literature by focusing on student engagement and online learning in South Africa and examines how pandemic restrictions amplified pre existing inequalities within the higher education sector The book is divided into 3 sections The first section discusses various methods of instruction and the use of online tools for facilitating learning succeeded by a section focusing on the resource implications of moving to online learning platforms from a social justice perspective and finally the last section considers issues and concerns about online assessments and quality assurance Drawing on lessons from the experiences of South African educators and students during the pandemic this book provides a knowledge base essential for the effective management of online teaching and learning in Africa It is intended for academic stakeholders to develop and engender an improved higher education climate **Accessibility of Digital Higher Education in the Global South**

Mashau, Pfano, Farisani, Tshililo Ruddy, 2023-12-01 Accessibility of Digital Higher Education in the Global South authored by Pfano Mashau and Tshililo Farisani from the University of KwaZulu Natal South Africa is an academic book that examines the impact of the COVID 19 pandemic on higher education in Africa The book aims to provide a comprehensive analysis of the sustainability of the new normal approaches in African universities and institutions of learning as well as government responses to teaching and learning processes during and post pandemic The sudden outbreak of COVID 19 triggered demands for informal comfortable and self designed spaces that go beyond conventional formal classrooms where students can take initiative and demonstrate independence in learning However access to digitalized teaching methods remains problematic due to the digital divide among learners and the rural urban dichotomy The book invites researchers academics and scholars in the Global South to contribute to the narrative to document successes in and improve the higher education sector post pandemic The book covers a range of themes including the sustainability of digitalized teaching approaches integrative and interactive teaching and learning theories and practices government responses to teaching and learning processes comparative analysis of conventional and digitalized teaching and learning approaches and equality diversity and

participation in digitalized teaching and learning platforms among others

The Social Impacts of Mine Closure in South Africa Lochner Marais, 2022-09-05 This book investigates the relationship between mining mine closure and housing policy in post apartheid South Africa using concepts from new institutional economics and evolutionary governance theory Mine closures present a major challenge to the mining industry and governments with this being particularly noticeable in the Global South This book argues that the dependencies created by the mining industry and mine housing policies while a mine is operational cause serious societal problems when it closes To demonstrate this the book applies the concepts of place attachment asset based development and social disruption Conceptually the book challenges the view that place attachment and asset based development are the most appropriate and often the only policy responses in mining areas In South Africa the mining industry and the government have created comprehensive housing programmes linked to homeownership to promote place attachment stability and wealth among mine workers These programmes do not consider the disruption that mine closure might bring The book challenges the blind application during boom periods of policies which create long term dependencies that are difficult to manage when a mine closes This book will be of interest to students and scholars researching the social impacts of mining and the extractive industries social geography and sustainable development as well as policymakers and practitioners working with mine
