Vaal 2016 Brochure:

Mine Seismology: Seismic Warning Concept S.N. Glazer, 2017-10-03 This book illustrates how mine seismology can be used to improve underground safety standards. It describes several preventive actions that have been put into practice at the 5B Area of No 5 Shaft Vaal Reefs gold mine after issuing seismic warnings. These included additional safety pillars, changes in mining sequences and directions and a review of the mining strategy for the entire 5B area. The presented experiment with seismic warning concept was a success because it was an internal mine project. Further, the Vaal Reefs management adopted the philosophy that the success rate should be measured in the preventive actions taken, not in the success of the prediction itself. Reviewing these and other aspects, the book clearly demonstrates how mine seismology can effectively improve underground safety standards. Stefan Glazer's book addresses in a very comprehensive manner both technical and practical problems of implementing and then effectively using microseismic networks and data. Stefan proves that through comprehensive microseismic data analysis, the location of potential rock burst can be assessed and then prevention action plans can be developed, providing more confidence to management and workers that deposits can be mined safely. Michal Stawski, VP Strategic Geomechanical Specialist, PT Freeport Indonesia, began reading this story expecting to find a technical review of the science of seismology and its application in mining, but this book is much more than that. This is a must read for those managing seismically active mines and should provide a wake up call to the industry as the complexity surrounding the management of seismic risk needs to be clarified in order for this to advance. Eric Strom, Director Underground Mining, New Gold Inc. As a mining geotechnical practitioner having experience in large open pit and underground massive mining operations, I have learned that mining induced seismicity can have a significant impact on the safety and economics of operations. However, seismicity is a complex field that is generally left to specialists with little input from geotechnical engineers and engineering geologists. This is a must read for mine seismologists, geotechnical practitioners and mining engineers alike and will be a welcome and much needed addition to my own book cabinet. This will be an invaluable work as our industry progresses to the mining of new depths in both the underground and open pit environments. Desmond Mossop, Pr Sci Nat Principal Engineering Geologist, SRK Consulting.

The Komedi Bioscoop Dafna Ruppin, 2016-08-01 This fascinating study of early cinema in the Netherlands Indies explores the influences of new media technology on colonial society. The Komedi Bioscoop traces the emergence of a local culture of movie going in the Netherlands Indies, present day Indonesia, from 1896 until 1914. It outlines the introduction of the new technology by independent touring exhibitors, the constitution of a market for moving picture shows, the embedding of moving picture exhibitions within the local popular entertainment scene and the Dutch colonial authorities' efforts to control film consumption and distribution. Dafna Ruppin focuses on the cinema as a social institution in which technology, race and colonialism converged. In her illuminating study, moving picture venues in the Indies ranged from canvas or bamboo tents to

cinema palaces of brick and stone are perceived as liminal spaces in which daily interactions across boundaries could occur within colonial Indonesia's multi ethnic and increasingly polarized colonial society

Agronomic Crops Mirza Hasanuzzaman, 2019-11-23 Agronomic crops have provided food beverages fodder fuel medicine and industrial raw materials since the beginning of human civilization More recently agronomic crops have been cultivated using scientific rather than traditional methods However in the current era of climate change agronomic crops are suffering from different environmental stresses that result in substantial yield loss To meet the food demands of the ever increasing global population new technologies and management practices are being adopted to boost yields and maintain productivity under both normal and adverse conditions Further in the context of sustainable agronomic crop production scientists are adopting new approaches such as varietal development soil management nutrient and water management and pest management Researchers have also made remarkable advances in developing stress tolerance in crops However the search for appropriate solutions for optimal production to meet the increasing food demand is still ongoing Although there are several publications on the recent advances in these areas there are few comprehensive resources available covering all of the recent topics This timely book examines all aspects of production technologies management practices and stress tolerance of agronomic crops

The Rhodesian War Paul L. Moorcraft, Peter McLaughlin, 2016-01-20 A political and military analysis of this conflict in southern Africa with maps photos and a new introduction assessing its long aftermath A half century after the Universal Declaration of Independence this superb book depicts the military history of Southern Rhodesia from the first resistance to colonial rule through the period of UDI by the Smith government to the Lancaster House agreement that transferred power There are vivid accounts of the operations against the black nationalist guerillas by the security forces and the intensity of the fighting and courage of the participants will surprise and enthrall readers Atrocities were undoubtedly committed by both sides as the protagonists played for very high stakes But this is more than just a book on military operations The authors are able to provide expert analysis of the historical situation and examine events well into the twenty first century including Mugabe's operations against rival tribes and white farmers With a new introduction this is essential reading for those wishing to learn more about a counterinsurgency campaign and why despite the ingenuity of the Rhodesian military fighting against overwhelming odds and restricted by sanctions the outcome culminating in the Lancaster House Agreement was inevitable

Non-Chemical Weed Control Khawar Jabran, Bhagirath Chauhan, 2018-01-03 Non Chemical Weed Control is the first book to present an overview of plant crop protection against non food plants using non chemical means Plants growing wild particularly unwanted plants found in cultivated ground to the exclusion of the desired crop have been treated with herbicides and chemical treatments in the past As concern over environmental food and consumer safety increases research has turned to alternatives including the use of cover crops thermal treatments and biotechnology to reduce and eliminate unwanted plants This book provides insight into existing and

emerging alternative crop protection methods and includes lessons learned from past methodologies As crop production resources decline while consumer concerns over safety increase the effective control of weeds is imperative to insure the maximum possible levels of soil sunlight and nutrients reach the crop plants Allows reader to identify the most appropriate solution based on their individual use or case Provides researchers students and growers with current concepts regarding the use of modern environment friendly weed control techniques Presents methods of weed management an important part of integrated weed management in the future Exploits the knowledge gained from past sustainable weed management efforts

South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N.

Tempelhoff,2018-12-01 Geologists physicists and ecologists currently promote the idea of a post Holocene epoch the Anthropocene As a result of constant innovation and modernisation in the fields of engineering natural science management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth s atmosphere Comprehensive infrastructure development in water and sanitation the growing trend to seek additional resources in the form of groundwater desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa s water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country s water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources
