Deanship in the Global South Oliver J.J.

Seale,2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality

as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account. Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration.

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education, the images of dysfunction are everywhere. Student protests, violence, police presence, rubber or real bullets, class disruptions, burning tyres, damaged buildings, injury, and sometimes death. Reports of wholesale corruption. Year after year, often in the same set of universities, the problem of routine instability seems insoluble. The financial, academic, and reputational costs of ongoing dysfunction are high, especially for those universities caught up in the never-ending struggle to overcome apartheid legacies. Any number of explanations have been ventured, including a lack of resources, shortage of capacity, rural location, corrupt officials, and endemic conflict. *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities. At the heart of the problem lies the vexed issue of resources, or more pertinently, the relationship between resources and power: who gets what and why? Whatever else it aspires to be, commonly a place of teaching, learning, research, and public duty, a university in an impoverished community is also a rich concentration of resources around which corrupt staff, students, and those outside of campus all vie for access. Taking a political-economic approach, Jonathan Jansen describes the daily struggle for institutional resources and offers accessible, sensible insights. He argues that the problem won't be solved through investments in capacity building alone; because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Rather, durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions. This groundbreaking and long-overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly.

Paper-based Diagnostics Kevin J. Land, 2018-12-11 This book explores the status of paper-based diagnostic solutions or Microfluidics 2.0.
