Boycotting tropical timber reduces its economic value and provides an incentive to burn down forests making them available for subsequent agricultural use or livestock farming In contrast a certification scheme for sustainably produced timber tropical or non tropical protects the forests by raising their economic value Examined here the impact of a certification scheme on German demand for tropical timber A partial equilibrium model is developed for the German tropical timber market as a whole as well as for five important submarkets representing 50% of the total demand The results reveal that a credible certification scheme can induce a significant expansion of demand for sustainably produced tropical timber This holds true for a scheme restricted to Germany as well as for an OECD wide approach *Agricultural Index* ,1927 Labour Law in the Netherlands Antoine T.J.M.
