 endocrine disorder According to the WHO and American Diabetes Mellitus diabetes mellitus is the 3rd leading cause of death
 if we were to include all secondary complications However without including secondary complications it is 7th place in
 mortality and morbidity The point to be considered in the case of diabetes mellitus is the secondary complications caused in
 this condition Almost all organs affected by diabetes and results in a potentially worse condition The major secondary
 complications are neuropathy nephropathy retinopathy and diabetes foot microvascular and macrovascular complications
 The long term complications grow slowly in the case of diabetes As the time living with diabetes becomes longer controlled
 glucose levels will be more difficult to achieve meaning there there will be more long term complications The aim of the
