*The Times Index* ,2011 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement      *Proliferation Watch* ,1992      **Strengthening the Nuclear Nonproliferation Regime** Paul Vorbeck Lettow,2010 Nuclear technology has long been recognized as capable of both tremendous benefits and tremendous destruction With this in mind countries have devised international arrangements intended to promote peaceful nuclear applications while preventing the spread of materials equipment and technologies useful for producing nuclear weapons Today however it is clear that this global nonproliferation regime is falling short North Korea withdrew from the Nuclear Nonproliferation Treaty NPT in 2003 and has since tested two nuclear devices Iran while still a party to the NPT has developed the capacity to enrich significant amounts of uranium many believe it is seeking to build nuclear weapons or at least attain the ability to do so In addition there is the challenge of facilitating the expansion of nuclear energy something that could help reduce carbon emissions while preventing countries from using related technologies for military purposes Finally the prevalence of nuclear materials only intensifies the fear that terrorist groups could acquire them through theft or a deliberate transfer from a state Given these challenges it is fitting that nuclear issues are near the top of today s foreign policy agenda President Barack Obama organized a nuclear security summit in April to discuss ways to secure nuclear materials and reduce the threat of terrorism and NPT signatories

will gather in May for the five yearly NPT review conference The United States and Russia have reached a successor agreement calling for further reductions in their nuclear arsenals And the United States and others continue to pursue both sanctions and negotiations with the aim of limiting Iran s nuclear capabilities In this Council Special Report Paul Lettow examines the shortcomings of the nonproliferation regime and proposes a comprehensive agenda to shore it up He first explores the challenges facing current arrangements chief among them the spread of enrichment and reprocessing technologies needed to produce fissile material Lettow then makes a variety of recommendations First he calls for tighter sanctions on Iran with the goal of dissuading it from continuing its nuclear advances and discouraging others from following Tehran s path To combat the spread of enrichment and reprocessing the report urges the United States to lead nuclear suppliers in developing a system that would allow the sale of relevant equipment and technology only to countries that meet demanding criteria As regards a potential multilateral nuclear fuel bank the report argues for limiting participation to states that have a strong nonproliferation record and agree not to make their own nuclear fuel Lettow further recommends a larger budget more authority and various policy changes for the International Atomic Energy Agency so that it can better detect dangerous violations of nonproliferation agreements Finally he urges a series of steps in the United Nations Security Council to punish violators and deal with countries that seek to withdraw from the NPT while in noncompliance with their obligations Strengthening the Nuclear Nonproliferation Regime provides an authoritative look at today s nuclear related concerns and what can be done to address them With its thoughtful analysis and comprehensive recommendations it makes a strong contribution on a subject of vital importance And given the challenges now testing the nonproliferation regime as well as the issue s prominence in the foreign policy debate the report could not come at a better time Iran's Deadly Ambition Ilan Berman,2016-12-06 Are we on the cusp of détente with Iran Conventional wisdom certainly seems to believe so Since the start of diplomacy between the Islamic Republic and the P5 +1 powers the United States France England Russia China Germany in November 2013 hopes have been running high for a historic reconciliation of Iran s clerical regime with the West Yet there is ample reason for skepticism that the United States and its allies can truly curb Iran s nuclear ambitions by diplomatic means Moreover the West s current focus on Iran s nuclear program is deeply dangerous insofar as it fails to recognize let alone address Iran s other international activities or its foreign policy aims Those objectives are global and they continue to grow in scope and menace In this sobering book Ilan Berman illuminates the multiple dimensions of the Iranian threat and exposes the perils of lodging confidence in diplomacy with the Islamic Republic The North Korean Threat Douglas C. Lovelace (Jr),2017 Terrorism Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism as well as efforts by the United States and other nations to protect their national security interests Volume 145 The North Korean Threat examines the strategies adopted by the United States China and the international community in response to the nuclear

threat posed by North Korea The volume includes a selection of documents chosen to illustrate developments in this area from 2010 through 2016 with commentary from series editor Douglas C Lovelace Jr The documents in this volume include 2016 UN Security Council resolutions on North Korea Congressional Research Service reports covering various aspects of the U S response to North Korea s nuclear program a U S Department of Defense report prepared for Congress on military and security developments related to North Korea and a detailed description of the U S sanctions program against North Korea from the U S Treasury Department s Office of Foreign Assets Control
