Design for Transport Mike Tovey, 2016-04-15 The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility The authors show how creative designers can take a user focused approach for a wide range of types of transport products and systems In so doing their starting point is one of creative dissatisfaction with what is currently available and their specialist capability is in imagining and developing new solutions which respond to that opportunity How this is tackled varies depending on the context and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for The chapters cover user needs and transport design and the transport system transport design case studies and the case for the automobile A conclusion briefly signals what the future for transport design might be Lavishly illustrated throughout in four colour Design for Transport is an imaginative and rigorous guide to how designers can take a user centred and socially responsible approach to tackling a range of types of transport from systems to products and from bicycles to automobiles demonstrating a rich array of solutions through case studies

A Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Henrik Duer, Camilla Rosenhagen, Nordic Council of Ministers, 2011 The report discusses how economic instruments can be used to

reduce CO2 emissions from passenger cars in the Nordic countries The analysis indicate that the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars

Handbook of Energy Cutler J. Cleveland, Christopher G. Morris, 2013-05-02. Handbook of Energy Volume I: Diagrams, Charts, and Tables provides comprehensive, organized coverage on all phases of energy and its role in society, including its social, economic, political, historical, and environmental aspects. While there is a wealth of information about energy available, it is spread across many books, journals, and websites, and it tends to target either a particular form of energy or a specific audience. Handbook of Energy provides a central repository of information that meets diverse user communities. It focuses on visual, graphic, and tabular information in a schematic format. Individuals and researchers at all educational levels will find the Handbook of Energy to be a valuable addition to their personal libraries. Easy-to-read technical diagrams and tables display a vast array of data and concepts.

Functional Thinking for Value Creation Jürgen Hesselbach, Christoph Herrmann, 2011-03-18. After the IPS2 conferences in Cranfield and Linköping in 2009 and 2010, the 3rd CIRP International Conference on Industrial Product Service Systems (IPS2 2011) takes place in Braunschweig, Germany. IPS2 itself is defined as an integrated industrial product and service offering that delivers value in use. The customers expect comprehensive solutions which are adapted to their individual needs. IPS2 offers the possibility to stand out from competition and for long-term customer loyalty. Particularly in times of economic crisis, it

becomes apparent which producing companies understand to satisfy the needs and requirements of their customers Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines The 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas Corporate Identity and Crisis Response Strategies Olga Bloch, 2014-06-10 The history of crisis management shows that companies embark on particular strategies in response to crisis So why are some companies crisis communication strategies successful while others are not The purpose of this book is to broaden the existing knowledge of crisis response strategies by focusing on corporate identity as one of the factors that is most likely to influence their choice Drawing upon insights from the sensemaking and chaos theories as well as traditional and alternative non European approaches to strategy formation Olga Bloch contends that there is a reciprocal relationship between corporate identity and crisis response strategies This relationship is examined on the example of Toyota Motor Corporation s communication in response to a crisis caused by a series of recalls of its vehicles in 2009 2010
