West Asian Civilization Akira Tsuneki, Shigeo Yamada, Ken-ichiro Hisada, 2016-08-19 This book explores aspects of the ancient civilization in West Asia which has had a great impact on modern human society agriculture metallurgy cities writing regional states and monotheism all of which appeared first in West Asia during the tenth to first millennia BC The editors specifically use the term West Asia since the Middle East is seen as an Eurocentric term By using this term the book hopes to mitigate potential bias i e historical and Western by using a pure geographical term However the West Asia region is identical to that of the narrower Middle East which encompasses modern Iran and Turkey from east to west and Turkey and the Arabian Peninsula from north to south This volume assembles research from different disciplines such as the natural sciences archaeology and philology linguistics in order to tackle the question of which circumstances and processes these significant cultural phenomena occurred in West Asia Scrutinizing subjects such as the relations between climate geology and human activities the origins of wheat cultivation and animal domestication the development of metallurgy the birth of urbanization and writing ancient religious traditions as well as the treatment of cultural heritage the book undertakes a comprehensive analysis of West Asian Civilization that provided the common background to cultures in various areas of the globe including Europe and Asia These contributions will attempt to demonstrate a fresh vision which emphasizes the common cultural origin between Europe and West Asia standing in opposition to the global antagonism symbolized by the theory of Clash of Civilizations

Development and Novel Applications of Geochemical Proxies in Marine and Terrestrial Carbonate Records Johan Schijf, Tsuyoshi Watanabe, Ed Hathorne, Hali Kilbourne, 2024-12-04 Information on parameters like global ice volume or nutrient availability is critical for developing and testing models of climate and environmental conditions in the past few thousand years However reliable measurements of such parameters only go back about a century and before the advent of satellites were sparsely distributed across the planet Instrumental records can be extended through the use of geochemical proxies in well dated carbonate deposits for example Sr Ca ratios in coral aragonite cores as a proxy for sea surface temperature Due to ongoing advances in analytical and micro sampling techniques these proxies now comprise a multitude of elemental ratios isotopic systems and redox couples incorporated in carbonate minerals precipitated by numerous organisms and processes Novel geochemical proxies in carbonate mineral records are being developed by scientists from an increasingly broad spectrum of fields and applied to an ever growing number of environmental systems and questions using a wide variety of advanced analytical instruments and methods Concurrently these developments are leading to new insights that enable established proxies to be reevaluated and improved The time is right for a Research Topic that brings these experts together and helps them push their efforts forward by comparing notes reviewing the present state of the science and highlighting outstanding problems or controversies

Sedimentary Coastal Zones from High to Low Latitudes I.P. Martini, H.R. Wanless , 2014-10-24 We live in a world where the loss of sea ice and

thawing of coastal grounds in the north and renewed marine transgression and an increase in the frequency of extreme weather events globally are becoming commonplace This volume presents a timely examination of coasts the geological environment at particular risk as global warming brings on this new reality In 23 papers low lying mainly siliciclastic coasts are reviewed described and analysed under a variety of climates in quasi stable tectonic settings along passive trailing continental edges from Polar Regions to the Tropics Examples include coast of the Arctic seas temperate to tropical eastern shores of the Americas western Portugal Mediterranean Persian Gulf South Africa and Australia The entire coastal zone landscape is considered ranging from geophysical processes and products to biological entities including the adaption of Native People in various climatic zones Knowledge of the state of the coasts now and how the coastal plain has evolved since Late Pleistocene is crucial for any realistic planning for the future

Quaternary of the Trent David R. Bridgland, Andy Howard, Mark J. White, Tom S. White, 2014-03-31 This volume is an integrated overview and synthesis of available data relating to the Quaternary evolution of the River Trent It provides detailed descriptions of the Pleistocene sedimentary records from the Trent its tributaries and related drainage systems a sedimentary record that spans a period of approximately half a million years and the biostratigraphical and archaeological material preserved therein Significant new data are presented from recently discovered sites of geological and archaeological importance including previously unrecognised fluvial deposits as well as novel analyses such as mathematical modelling of fluvial incision as recorded by the river terrace deposits In combination with a thorough review of the literature on the Trent these new data have contributed to revised chronostratigraphical and palaeogeographical frameworks for central England and revealed the complexity of the Pleistocene fluvial and glacial records in this region The fragmentary Trent terrace sequence is an important element of wider reconstructions of Pleistocene palaeodrainage in Britain providing a link between the records preserved in the English Midlands and those in East Anglia

Global Environments Through the Quaternary David E. Anderson, Andrew Goudie, Adrian Parker, 2013-02-07 This book delves into the environmental changes that have taken place during the Quaternary the two to three million years during which humans have inhabited the Earth and conveys the relevance of the study of this period to current environmental and climatic concerns
