Global Africa Dorothy Hodgson, Judith Ann-Marie Byfield, 2017-08. Global Africa will complicate conventional views of Africa as a place of violence, despair and victimhood, a place and space that other people, states and organizations act on and steal from. Instead, they aim to document some of the significant global connections, circulations and contributions that African people, ideas and goods have made in the world, not just in the United States but in South Asia, Latin America, Europe and elsewhere. They will showcase new framings of Africa but will not romanticize the conditions and circumstances in which too many people on the continent currently live. The essays in this volume will amplify those voices that offer complex and insightful explanations, strategies for solutions and inspiration for the future. Provided by publisher.

The Archaeology of Southern Africa Peter Mitchell, 2024-06-06. Some of humanity's earliest ancestors lived in southern Africa, and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition. Building on its rich rock art heritage, archaeologists have developed theoretical work that continues to influence rock art studies worldwide, with the relationship between archaeological and anthropological data central to understanding past hunter-gatherer, pastoralist and farmer communities alike. New work on pre-colonial states contests models that previously explained their emergence via external trade, while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency, feeding into efforts to decolonise the discipline itself. Inhabited by humans longer than almost anywhere else and with an unusually varied complex past, southern Africa thus has much to contribute to archaeology worldwide. In this revised and updated edition, Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years.
