Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict **Corrupted** takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Quality Management Implementation in Higher Education: Practices, Models, and Case Studies* Sony, Michael, Karingada, Kochu Therisa, Baporikar, Neeta, 2019-08-02 Although initially utilized in business and industrial environments quality management systems can be adapted into higher education to assess and improve an institution's standards These strategies are now playing a vital role in educational areas such as teaching learning and institutional level practices However quality management tools and models must be adapted to fit with the culture of higher education *Quality Management Implementation in Higher Education Practices Models and Case Studies* is a pivotal reference source that explores the challenges and solutions of designing quality management models in the current educational culture Featuring research on topics such as Lean Six Sigma distance education and student supervision this book is ideally designed for school board members administrators deans policymakers stakeholders professors graduate students education professionals and researchers seeking current research on the applications and success factors of quality management systems in various facets of higher education **Public Intellectuals in South Africa** Chris Broodryk, 2021-07-01 This edited collection gives voice to neglected public intellectuals in the arts humanities and journalism in South Africa who gave voice and presence to those who have been marginalized and silenced in South African history Edward Said described a

public intellectual as someone who uses accessible language to address a designated public on matters of social and political significance. The essays in *Public Intellectuals in South Africa* apply this interpretive prism and activist principle to a South African context and tell the stories of well known figures as well as some that have been mostly forgotten. They include Magesa Fuze, John Dube, Aggrey Klaaste, Mewa Ramgobin and Koos Roets alongside marginalized figures such as Elijah Makiwane, Mandisi Sindo, William Pretorius and Dr Thomas Duncan Greenlees. The essays capture the thoughts and opinions of these historical figures who the contributors argue are public intellectuals who spoke out against the corruption of power, promoted a progressive politics that challenged the colonial project and its legacies and encouraged a sustained dissent of the political status quo. Offering fascinating accounts of the life and work of these writers, critics and activists across a range of historical contexts and disciplines from journalism and arts criticism to history and politics, it enriches the historical record of South African public intellectual life. This volume makes a significant contribution to ongoing debates about the value of research in the arts and humanities and what constitutes public intellectualism in South Africa. **Scaffolding**

work-integrated learning excursions Adri Du Toit, Neal Petersen, Iman C. Chahine, 2025-02-28. In South Africa, work-integrated learning (WIL) excursions are crucial in preparing university students for the world of work. As higher education institutions (HEIs) evolve to promote equity and inclusivity, these excursions are continuously refined to enhance student learning outcomes. This scholarly book explores how WIL excursions support self-directed learning (SDL) and foster skills essential for the 21st century, such as active learning, intercultural sensitivity, and epistemological access. A key focus is on the 2023 WIL excursions at North West University (NWU), which align with South Africa's National Development Plan 2030 and the University Capacity Development Grant's (UCDG) goal of equipping graduates to address contemporary societal challenges. The book examines first-year excursions across three faculties: Education, Health Sciences, and Law, using both virtual and in-person experiences to develop intercultural citizenship, communication, and a sense of belonging. Through research-based insights, the chapters highlight how these excursions were designed and implemented to help students recognise personal biases, deepen cultural awareness, and take responsibility for their own learning. Additionally, the book underscores how students were encouraged to identify their learning needs and access resources that promote ongoing self-directed growth. By linking WIL to SDL, the book provides novel perspectives on fostering inclusivity and preparing students for their academic journeys, professional careers, and contributions to a more socially just world. **Africa and Globalization**

Kelebogile T. Setiloane, Abdul Karim Bangura, 2020-10-24. This edited volume examines the challenges of globalization in light of the need to revisit and reconceptualize the notion of Pan-Africanism. The first part of the book examines globalization and Africa's socioeconomic and political development in this century by using the Diopian Pluridisciplinary Methodology. This approach is imperative because the challenges faced by Africa vis-à-vis globalization and socioeconomic development are so multiplexed that no single disciplinary approach can adequately analyze them and yield substantive policy recommendations.

The chapters in the second part analyze the imperatives for Africa's global knowledge production development and economic transformation in the face of the pressures of globalization. Part two demonstrates an urgent need for Africa's significant participation in the global knowledge economy in order to meet the continent's modern transformation and development aspirations. The final part examines lessons from old and new Pan-Africanism and how they can be utilized to deal with the challenges emanating from the forces of modern globalization. With its multidisciplinary approach to a wide range of pressing modern issues for the African continent, this book is essential reading for scholars across the social sciences interested in where Africa is now and where it should go in this increasingly globalized world.

Tourism Safety, Security and Resilience Rami K. Isaac, Shem Wambugu Maingi, Vanessa GB Gowresunkaar, 2024-11-18. This significant volume critically explores the implications of tourism safety and security and how communities in tourism destinations try to be resilient in the face of these impacts. Written by leading scholars, this book offers new insight into the conceptual and practical knowledge of community resilience due to tourism security and safety issues. Chapters examine these topics through an integrated community perspective to provide comprehensive consideration of the interconnected facets of a community encompassing social, economic, environmental, and cultural dimensions when evaluating and addressing matters pertaining to tourism management, safety, security, and resilience. This book is structured around different conceptual, theoretical, and practical strategies employed by destinations to foster and sustain community resilience, particularly during periods of crises as well as communities in the context of tourism recovery. It examines this across geographical borders and in many different contexts, not just locations of tourism or types of tourism such as religious tourism and different types of crises including natural disasters, pandemics, and terrorism. This book is an essential reading for all tourism students, researchers, and academics as well as for those interested in conflict and crises recovery.

Industry 4.0 - Shaping The Future of The Digital World Paulo Jorge da Silva Bartolo, Fernando Moreira da Silva, Shaden Jaradat, Helena Bartolo, 2020-10-28. The City of Manchester, once the birthplace of the 1st Industrial Revolution, is today a pioneering hub of the 4th Industrial Revolution. Industry 4.0, offering Industry 4.0 solutions in advanced materials, engineering, healthcare, and social sciences. Indeed, the creation of some of the city's greatest academic institutions was a direct outcome of the industrial revolution, so it was something of a homecoming that the Sustainable Smart Manufacturing S2M Conference was hosted by The University of Manchester in 2019. The conference was jointly organised by The University of Manchester, The University of Lisbon, and The Polytechnic of Leiria, the latter two bringing in a wealth of expertise in how Industry 4.0 manifests itself in the context of sustainably evolving, deeply rooted cities. S2M 2019 instigated the development of 61 papers selected for publication in this book on areas of Smart Manufacturing, Additive Manufacturing, and Virtual Prototyping, Materials for Healthcare Applications, and Circular Economy, Design, Education, and Urban Spaces.
