 Charles Park Hardkernel Co Founder **Managing Nongovernmental Organizations** Frederik Claeyé,2014-03-26 The
 idea that international development aid needs to be better managed and coordinated gained currency in the early 1990s The
 increasing emphasis on management has resulted in the present vogue of managing for development results as one of the
 central tenets in the discourse on international aid But how appropriate are these ideas tools and techniques for non
 governmental development organizations NGOs and how much does geographic context matter Examining the current
 debate on aid effectiveness and the role of NGOs in contributing to it this book highlights the critical importance of
 understanding how the global and the local interact to increase aid efficacy and develop more culturally astute ways of
 managing NGOs With a focus on NGOs active in sub Saharan Africa as case studies author Frederik Claey demonstrates that
 NGOs are not mere passive recipients of management knowledge and practices emanating from the global governance
 structure of international aid but actively engage with these ideas and practices to translate and rework them through a local
 cultural lens This process results in the emergence of unique hybrid management systems that combine the pressure to
 become more business like with the mission to satisfy the demands of the communities they serve *Learning Chef* Mischa
