

One of the great strengths of literature is its ability to evoke a wide range of feelings from its readers while simultaneously revealing attitudes about characters or periods. I've always admired the creative mind of a writer. Therefore, I always want to study English Literature at XXX university.

An appreciation of classic literature whetted my literary appetite. I found Austen's fascination with the female characters of Georgian society amusing, particularly the way marriage was such an important part of their lives; her books seemed to erase excessive vulnerability from the female characters, leaving them as thoughtful as Anne Elliot, as intelligent as Elizabeth Bennet, and as imaginative as Catherine Morland, among others.

Victorian literature was also very captivating in my eyes. Wilde's "The Importance Of Being Earnest" offered me a satirical view of the nineteenth-century social hierarchy. I was enthralled by the way the superiors, like the House of Lords, preserved their dominance and refused to mingle with the underprivileged.

I have come to love the art of close reading more recently. I loved how the creative use of language in 'The God of Small Things', such as capitalization, highlighted essential events through the eyes of the twins. Close reading also helped me understand the life of a governess in Victorian England and helped me to distinguish between the romantic outlook of 'Jane Eyre' as opposed to the 'mundanity' of Anne Bronte in 'Agnes Grey'. In my AS English Literature course, I found it essential to develop my ability to analyze characters and ideas critically, particularly in the novel 'Frankenstein'. I found it interesting that Frankenstein's arrogance leads to the creature's destruction and that Shelley challenges humanity's desire to go beyond the limits of science. However, I found myself sympathetic to him as he was eager to pioneer a new way for mankind, and likened him to scientists today.

Communication skills is one of the most enjoyable thing for me outside the college, which is very important for an English learner. Being a Syrian delegate at Model United Nations during the height of the crisis was challenging but it taught me how to produce impactful responses. I am a Marie Curie cancer care volunteer and it also taught me how to work well in a team which is very valuable to me. I was associated with the Summer reading challenge at my domestic library and it developed in me a curiosity for stories that I had never heard before.

My love of English has only grown over the years and my ability and diligence in learning will serve me well during my time at the university. I look at literature with absolute passion which will help me to enjoy the challenges that lie ahead.

A Compelling Case for Universities Quintin McKellar, 2025-05-01 This book unapologetically celebrates the achievements of the University Major drivers of enlightenment and powerhouses of the economy universities have evolved and thrived for over a thousand years While still reflecting their beginnings in medieval knowledge sharing communities modern universities have grown exponentially in both size and number Predictions suggest global student numbers will more than double from 216 million in 2016 to 472 million in 2035 This growth has demanded new models of funding as well as many new providers who have added diversity and complexity to the traditional idea of a university The author recounts this exciting evolution before turning to the major issues with which higher education is concerned today broadly following the student journey from admission to graduation and beyond A prospective university student first needs to gain a place the process throwing up important questions about access and equity Once admitted they can benefit from not only the education on offer but a wealth of extra curricular opportunities And research suggests that once they leave the experience of university will enrich their life in numerous ways With clearheaded chapters on research and innovation and thoughtful excursions into funding and governance together with some proposals for change this is a trenchant review of today's university landscape which nonetheless concludes that the current model of higher education is both highly effective and sufficiently adaptive Whilst facing up to difficult issues which must be addressed Professor McKellar derives satisfaction

from the evidence of great overall achievement
