**The Changing Economic Geography of Globalization** Giovanna Vertova, 2006-04-20 The process of globalization has had profound often destabilizing effects on space at all levels i.e. local regional national international This revealing book analyzes both theoretically and empirically the effects of globalization over space It considers through a dialogue among different paradigms the ways in which space has become more important in the global economy Globalization has been advocated as a way of shrinking time and space which will lead to a homogenized global market a suggestion challenged in differing ways and with a variety of approaches by all the contributors to this volume Leading authorities from a range of disciplines are represented amongst this impressive list of contributors including Eric Sheppard Bjørn Asheim Richard Walker and Peter Swann The chapters demonstrate persuasively the continuing and even increasing role of space in the global economy and throughout the book covers viewpoints from the

fields of international political economy economic geography regional and local economics This impressive volume which contains a selection of the best in contemporary scholarship will be of interest to the international arena of academicians policy makers and professionals in these or related fields *The Geographical Magazine* ,1987-07 The SAGE Handbook of Geographical Knowledge John A Agnew,David N Livingstone,2011-03-04 Broad in scope and edited by two massive names in geography this is a critical exploration of how the field has emerged and fared over the course of its modern institutionalization *Geographers* Elizabeth Baigent,André Reyes Novaes,2018-11-15 *Geographers Biobibliographical Studies* Volume 37 explores the concept of distinction in geography Through the lives of six geographers working in Brazil North America Europe and R union it investigates what distinction consists of how we identify and celebrate it and how it relates to quotidian practices in the discipline The volume highlights the continuing importance of biography and the International Geographical Union in recording and assessing distinction It also considers the relevance of personal networks for the circulation and translation of distinguished geographical knowledge and how this knowledge can underpin applied projects and critical appraisal of geographical scholarship both at a national and sub national level Gendered notions of distinction are also addressed particularly through June Sheppard who found limited recognition for her work as a result of gendered expectations within the discipline and society at large By reflecting on how we locate distinguished geographers and tell their histories *Geographers Biobibliographical Studies* Volume 37 makes an important contribution to fostering less canonical work in historical geography **Geographers** Hayden Lorimer,Charles W. J. Withers,2016-09-22 *Geographers Biobibliographical Studies* Volume 35 includes seven essays discussing the contribution made to geography by eleven geographers The subjects include three British figures Francis Rennell Rodd 1895 1978 expert on the Sahara David Harris 1930 2013 a geographer with archaeological interests and William Gordon East historical geographer 1902 1998 a Spanish urban scholar Enric Martin 1928 2012 Mauricio de Almeida Abreu 1948 2011 a Brazilian urban and historical geographer and two essays on French geographers one on Jacques Levainville 1869 1932 the other an innovative prosopographical essay on five French authors involved in the monumental Vidalian *Geographie Universelle* of the early 20th century In these studies geography s international dimensions are illuminated and the subject s vibrant history shown to be the result of committed endeavours in the field in the classroom and in print **Geography** ,1981 Includes section Reviews and other bibliographical material **The Origins And Spread Of Agriculture And Pastoralism In Eurasia** David R. Harris,2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geogrphical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia

Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization *The Man in the Monkeynut Coat*
