The Obligation to Extradite Or Prosecute Kriangsak Kittichaisaree, 2018 It was hoped that the creation of the International Criminal Court would enable the extradition and prosecution of crimes which shock the world Fifteen years later Kittichaisaree scrutinises the achievements and limitations of the court so far offering his own vision for ensuring that no international criminal escapes the eye of justice

Polymorphism in Molecular Crystals Joel Bernstein, 2020-04-28 Most people are familiar with the fact that diamond and graphite are both composed only of carbon yet they have very different properties which result from the very different structures of the two solids they are polymorphs of carbon Understanding the relationship between the structures and the properties of materials is of fundamental importance in developing and producing new materials with improved or new properties The existence of polymorphic systems allows the direct study of the connection between structures and properties This book provides grounding on the fundamental structural and energetic basis for polymorphism the preparation and characterization of polymorphic substances and its importance in the specific areas of pharmaceuticals pigments and high energy explosive materials The closing chapter describes the intellectual property implications and some of the precedent patent litigations in which polymorphism has played a central role The book contains over 2500 references to provide a ready entry into the relevant literature

Virtual Drug Design Daniela Schuster, Honglin Li, 2020-01-13 In the current drug research environment in academia and industry cheminformatics and virtual screening methods are well established and integrated tools Computational tools are used to predict a compound's 3D structure the 3D structure and function of a pharmacological target ligand target interactions binding energies and other factors essential for a successful drug This includes molecular properties such as solubility logP value susceptibility to metabolism cell permeation blood brain barrier permeation interaction with drug transporters and potential off target effects Given that approximately 40 million unique compounds are readily available for purchase such computational modeling and filtering tools are essential to support the drug discovery and development process The aim of all these calculations is to focus experimental efforts on the most promising candidates and exclude problematic compounds early in the project In this Research Topic on virtual activity predictions we cover several aspects of this research area such as historical perspectives data sources ligand treatment virtual screening methods hit list handling and filtering

Universal Jurisdiction over Core International Crimes Lachezar Yanev, Harmen van der Wilt, 2025-09-10 This timely book explores how the domestic courts of states across Europe North America and Oceania have defined and applied their substantive laws in universal jurisdiction trials for core international crimes It considers what universal justice actually looks like in the national courtrooms of diverse states and probes the extent to which there is uniformity in the pursuit to punish universally condemned crimes

Processing, Analyzing and Learning of Images, Shapes, and Forms: Part 2, 2019-10-16 Processing Analyzing and Learning of Images Shapes and Forms Part 2 Volume 20 surveys the contemporary developments relating to the analysis and

learning of images shapes and forms covering mathematical models and quick computational techniques Chapter cover Alternating Diffusion A Geometric Approach for Sensor Fusion Generating Structured TV based Priors and Associated Primal dual Methods Graph based Optimization Approaches for Machine Learning Uncertainty Quantification and Networks Extrinsic Shape Analysis from Boundary Representations Efficient Numerical Methods for Gradient Flows and Phase field Models Recent Advances in Denoising of Manifold Valued Images Optimal Registration of Images Surfaces and Shapes and much more Covers contemporary developments relating to the analysis and learning of images shapes and forms Presents mathematical models and quick computational techniques relating to the topic Provides broad coverage with sample chapters presenting content on Alternating Diffusion and Generating Structured TV based Priors and Associated Primal dual Methods

A New Generation Material Graphene: Applications in Water Technology Mu. Naushad, 2018-06-20 This book presents a unique collection of up to date applications of graphene for water science Because water is an invaluable resource and the intelligent use and maintenance of water supplies is one of the most important and crucial challenges that stand before mankind new technologies are constantly being sought to lower the cost and footprint of processes that make use of water resources as potable water as well as water for agriculture and industry which are always in desperate demand Much research is focused on graphene for different water treatment uses Graphene whose discovery won the 2010 Nobel Prize in physics has been a shining star in the material science in the past few years Owing to its interesting electrical optical mechanical and chemical properties graphene has found potential applications in a wide range of areas including water purification technology A new type of graphene based filter could be the key to managing the global water crisis According to the World Economic Forum s Global Risks Report lack of access to safe clean water is the biggest risk to society over the coming decade Yet some of these risks could be mitigated by the development of this filter which is so strong and stable that it can be used for extended periods in the harshest corrosive environments and with less maintenance than other filters on the market The graphene based filter could be used to filter chemicals viruses or bacteria from a range of liquids It could be used to purify water dairy products or wine or in the production of pharmaceuticals This book provides practical information to all those who are involved in this field

Real-Time Recursive Hyperspectral Sample and Band Processing Chein-I Chang, 2017-04-23 This book explores recursive architectures in designing progressive hyperspectral imaging algorithms In particular it makes progressive imaging algorithms recursive by introducing the concept of Kalman filtering in algorithm design so that hyperspectral imagery can be processed not only progressively sample by sample or band by band but also recursively via recursive equations This book can be considered a companion book of author s books Real Time Progressive Hyperspectral Image Processing published by Springer in 2016

Climate Change 2022 - Mitigation of Climate Change Intergovernmental Panel on Climate Change (IPCC), 2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change

Advances in Nonlinear Dynamics, Volume II
Walter Lacarbonara, 2024-05-01 This second of three volumes presents papers from the third series of NODYCON to be held in June of 2023 The conference papers reflect a broad coverage of topics in nonlinear dynamics both traditionally placed in established streams of research as well as they stand as newly explored and emerging venues of research These include Multi scale dynamics multiple time space scales large system dynamics Experimental dynamics benchmark experiments experimental methods instrumentation techniques measurements in harsh environments experimental validation of nonlinear models Reduced order modeling center manifold reduction nonlinear normal modes normal forms Systems with time and or space delays Nonlinear interactions in multi dof systems parametric vibrations multiple external and autoparametric resonances Computational techniques efficient algorithms use of symbolic manipulators integration of symbolic manipulation and numerical methods use of parallel processors Nonlinear system identification parametric nonparametric identification data driven identification Multibody dynamics rigid and flexible multibody system dynamics impact and contact mechanics tire modeling railroad vehicle dynamics biomechanics applications computational multibody dynamics Fluid structure interaction Nonlinear wave propagation in discrete and continuous media

Use of Recycled Plastics in Eco-efficient Concrete F. Pacheco-Torgal, Jamal Khatib, Francesco Colangelo, Rabin Tuladhar, 2018-11-21 Use of Recycled Plastics in Eco efficient Concrete looks at the processing of plastic waste including techniques for separation the production of plastic aggregates the production of concrete with recycled plastic as an aggregate or binder the fresh properties of concrete with plastic aggregates the shrinkage of concrete with plastic aggregates the mechanical properties of concrete with plastic aggregates toughness of concrete with plastic aggregates modulus of elasticity of concrete with plastic aggregates durability of concrete with plastic aggregates concrete plastic waste powder with enhanced neutron radiation shielding and more thus making it a valuable reference for academics and industrial researchers Describes the main types of recycled plastics that can be applied in concrete manufacturing Presents for the first time state of the art knowledge on the properties of conventional concrete with recycled plastics Discusses the technological challenges for concrete manufactures for mass production of recycled concrete from plastic waste

Information Science and Applications 2018 Kuinam J. Kim, Nakhoon Baek, 2018-07-23 This book contains selected papers from the 9th International Conference on Information Science and Applications ICISA

2018 and provides a snapshot of the latest issues encountered in technical convergence and convergences of security technology It explores how information science is core to most current research industrial and commercial activities and consists of contributions covering topics including Ubiquitous Computing Networks and Information Systems Multimedia and Visualization Middleware and Operating Systems Security and Privacy Data Mining and Artificial Intelligence Software Engineering and Web Technology The proceedings introduce the most recent information technology and ideas applications and problems related to technology convergence illustrated through case studies and reviews converging existing security techniques Through this volume readers will gain an understanding of the current state of the art information strategies and technologies of convergence security The intended readership includes researchers in academia industry and other research institutes focusing on information science and technology

Transition Metal-Dinitrogen Complexes Yoshiaki Nishibayashi,2019-01-25 A comprehensive book that explores nitrogen fixation by using transition metal dinitrogen complexes Nitrogen fixation is one of the most prominent fields of research in chemistry This book puts the focus on the development of catalytic ammonia formation from nitrogen gas under ambient reaction conditions that has been recently repowered by some research groups With contributions from noted experts in the

field Transition Metal Dinitrogen Complexes offers an important guide and comprehensive resource to the most recent research and developments on the topic of nitrogen fixation by using transition metal dinitrogen The book is filled with the information needed to understand the synthesis of transition metal dinitrogen complexes and their reactivity This important book Offers a resource for understanding nitrogen fixation chemistry that is essential for explosives pharmaceuticals dyes and all forms of life Includes the information needed for anyone interested in the field of nitrogen fixation by using transition metal dinitrogen complexes Contains state of the art research on synthesis of transition metal dinitrogen complexes and their reactivity in nitrogen fixation Incorporates contributions from well known specialists and experts with an editor who is an innovator in the field of dinitrogen chemistry Written for chemists and scientists with an interest in nitrogen fixation Transition Metal Dinitrogen Complexes is a must have resource to the burgeoning field of nitrogen fixation by using transition metal dinitrogen complexes Socioeconomics, Philosophy, and Deneocoloniality Abdul Karim

Bangura,2025-08-21 Existing paradigms such as decoloniality simplify the complex dynamics between former colonies and colonial powers Such frameworks overlook the role of local elites in maintaining and even enhancing oppressive systems They also imply that external forces are responsible for ongoing exploitation This book tackles this concept head on by introducing a new methodology called deneocoloniality Deneocoloniality expands on decoloniality and neocolonialism It argues that while decoloniality focuses on the residual impacts of colonialism by external forces it neglects the internal dynamics where former colonized elites play a significant role in perpetuating oppression for personal gain The book presents socioeconomic and philosophical case studies to support deneocoloniality as a more comprehensive framework for understanding current realities in African countries Readers will gain a nuanced understanding of the intricate power structures affecting developing nations The book provides a structured methodology for analyzing problems emphasizing the importance of logical reasoning and collaborative efforts It offers practical solutions based on deep analysis moving beyond mere diagnosis to actionable recommendations This approach aims to equip readers with the tools needed to develop policies and strategies that address both external and internal sources of oppression **Kinematics of Mechanical Systems** Jorge

Angeles,Shaoping Bai,2022-11-04 This book is aimed to provide comprehensive and systematic knowledge of kinematic synthesis as developed up to date Modern mechanical systems require advance kinematics knowledge to support mechanism design with sound theories and methods The book includes not only the classical foundations of kinematic synthesis but also the latest advances developed by the authors Moreover many examples are included to illustrate both methods and their supporting theory The focus is on systems of rigid bodies forming closed loops The four bar linkage representing the foundations of mechanical systems is given due attention in its three domains planar spherical and spatial The book contains six chapters the first two covering fundamentals for kinematic synthesis including qualitative synthesis Chapters 3 5 describe in full detail the function motion and path syntheses of single dof linkages In the last chapter the synthesis of single dof

complex linkages including six bar and ten bar linkages is introduced The book is suitable for graduate students of mechanical engineering researchers of mechanism and robot design and machine design engineers
