Uk Construction Market Development Report 2004:

Corporate Social Responsibility in the Construction Industry Michael Murray, Andrew Dainty, 2013-01-11 The construction process right through from planning and design to use and demolition has a major impact on society. Traditionally concern has been focused on its environmental impact and the quest for sustainability but this has now extended into the wider remit of Corporate Social Responsibility (CSR). Essentially this means that businesses must act voluntarily in a socially ethical manner by developing a policy that encompasses the core principles enshrined by CSR. A unique presentation on a topic of emerging importance. Corporate Social Responsibility in the Construction Industry is essential reading for all built environment undergraduate and post graduate courses as well as CEOs and senior managers within construction businesses who may be about to embark on developing a CSR strategy. *The Construction Industry in the Fourth Industrial Revolution* Clinton Aigbavboa, Wellington Thwala, 2019-08-09 This book gathers papers from the 11th Construction Industry Development Board (CIDB) Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg, South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production, prefabrication, 3D printing and assembly offsite and advanced manufacturing. Cyber physical systems, actuators, sensors, IoT, robots and cobots for repetitive and dangerous tasks and drones for mapping, progress monitoring, safety and quality inspections, lifting, moving and positioning and Technologies, digital ecosystems, digital platforms, BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards and interoperability and vertical and horizontal integration. Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction. Construction Supply Chain Management in the Fourth Industrial Revolution Era Temidayo Oluwasola Osunsanmi, Clinton Aigbavboa, Wellington Didibhuku Thwala, Ayodeji E. Oke, 2022-09-23 Providing invaluable support for construction in determining the acceptable practice and standard for regulatory bodies and managers, Construction Supply Chain Management in the Fourth Industrial Revolution Era also appeals to researchers as it expands the frontiers of knowledge in the fourth industrial era. *Emerging Governance and Economic Issues in Construction Industry in Malaysia (Penerbit USM)* Omar Osman, 2014-11-25 The future of construction industry in a globalized, borderless, technology-driven decade is based upon a number of drivers. The book is written to provide a platform for analysis of the construction industry on some governance and economic issues deemed important and can affect the way construction industry will develop and grow in a particular country, particularly Malaysia. The reference to Malaysia may be similar to some but not all countries. The topics covered include governance, role of state and international organizations.

innovations markets and privatizations as well as sustainability The book should be a basis for future works or research in some of the areas discussed and should provide a specific reading for students at postgraduate and undergraduate levels
