Building Generative AI-Powered Apps Aarushi Kansal, 2024-03-23 Generative AI has gone beyond the responsibility of researchers and data scientists and is being used by production engineers. However, there is a lot of confusion where to get started when building an end-to-end app with generative AI. This book consolidates core models, frameworks, and tools into a single source of knowledge. By providing hands-on examples, the book takes you through the generative AI ecosystem to build applications for production. The book starts with a brief and accessible introduction to transformer models before delving into some of the most popular large language models and diffusion models for image generation. These models are the foundations of both AI and your potential new apps. You will then go through various tools available to work with these models, starting with LangChain, a framework to develop foundational models, which is the next building block you should grasp after understanding generative AI models. The next chapters cover databases, caching, monitoring, etc., which are the topics necessary to build larger-scale applications. Real-world examples using these models and tools are included. By the end of this book, you should be able to build end-to-end apps that are powered by generative AI. You also should be able to apply the tools and techniques taught in this book to your use cases and business.

What You Will Learn

- What is Generative AI?
- What is ChatGPT and GPT-4?
- What are language models and diffusion models?
- How do we deploy LangChain and HuggingFace?
- Who This Book Is For

Software engineers with a few years of experience building applications in any language or infrastructure.

Made in London Leah Hyslop, 2018-05-17 From Tudor oyster peddlers and Victorian pie and mash shops to the supper clubs and street food scene flourishing today, Britain's capital has always been a tantalizing draw for those who live to eat. In *Made in London*, born and bred Londoner Leah Hyslop offers a joyful celebration of the city and its food past and present. The book features recipes invented in the city, such as the 18th-century treat Chelsea buns, a favourite of King George II, and Omelette Arnold Bennett, created for the famous writer while staying at the Savoy Hotel. Alongside these are new, exciting dishes inspired by Leah's eating adventures around the capital, such as a mouthwatering Pimm's and lemon curd trifle, an unusual goat's cheese and cherry tart, and an easy twist on Indian restaurant Dishoom's iconic bacon naan, one of the best brunches in London. Interspersed with the recipes are short, entertaining histories and profiles about London's food scene, including the tale of the 18th-century gin craze, a profile of the East End's most beloved greasy spoon, and why Scotch eggs might have actually been invented in a London department store. Short shopping guides lifting the lid on such pressing gastronomic questions as where to buy cheese, the city's most delicious chocolate shops, or the best cocktail bars for a nightcap or two are also featured. Beautifully illustrated with contemporary photographs of London alongside vintage images sourced from historic archives, this is a book for anyone who has ever lived in, visited, or simply dreamt of sipping a cocktail while watching red buses trundle by in the world's greatest city.
