Forgotten Science S. D. Tucker, 2016-04-15 Was Jesus a giant electron How much does a mouse's soul weigh Can women mate with monkeys As mad as these questions may seem they have been asked by science in years gone by Forgotten Science unearths some of the most extraordinary attempts to understand the world around us **Stormy Skies** Paul Clark, 2016-04-01 As the airline industry struggles to extricate itself from its latest crisis the time has come to examine the fundamentals of airline business strategy in a more innovative way and find answers to the questions What went wrong and Why didn't we see it coming Stormy Skies captures the key issues that determine a viable airline industry in an increasingly globalised world and calls for more radical business thinking to ensure that mistakes are avoided in future It looks at the airline business through the eyes of both the airlines themselves and also their customers drawing upon the experience and views of industry personalities Defending Beef Nicolette Hahn Niman, 2014-10-31 For decades it has been nearly universal dogma among environmentalists and health advocates that cattle and beef are public enemy number one But is the matter really so clear cut Hardly argues environmental lawyer turned rancher Nicolette Hahn Niman in her new book Defending Beef The public has long been led to believe that livestock especially cattle erode soils pollute air and water damage riparian areas and decimate wildlife populations In Defending Beef Hahn Niman argues that cattle are not inherently bad for either the Earth or our own nutritional health In fact properly managed livestock play an essential role in maintaining grassland ecosystems by functioning as surrogates for herds of wild ruminants that once covered the globe Hahn Niman argues that dispersed grass fed small scale farms can and should become the basis for American food production replacing the factory farms that harm animals and the environment The author a longtime vegetarian goes on to dispel popular myths about how eating beef is bad for our bodies She methodically evaluates health claims made against beef demonstrating that such claims have proven false She shows how foods from cattle milk and meat particularly when raised entirely on grass are healthful extremely nutritious and an irreplaceable part of the world's food system Grounded in empirical scientific data and with living examples from around the world Defending Beef builds a comprehensive argument that cattle can help to build carbon sequestering soils to mitigate climate change enhance biodiversity help prevent desertification and provide invaluable nutrition Defending Beef is simultaneously a book about big ideas and the author's own personal tale she starts out as a skeptical vegetarian and eventually becomes an enthusiastic participant in environmentally sustainable ranching While no single book can definitively answer the thorny question of how to feed the Earth's growing population Defending Beef makes

the case that whatever the world's future food system looks like cattle and beef can and must be part of the solution **The Ethical Carnivore** Louise Gray, 2016-09-22 WINNER OF TWO 2017 GUILD OF FOOD WRITERS AWARDS BEST FOOD BOOK AWARD AND THE CAMPAIGNING AND INVESTIGATIVE FOOD WORK AWARD SHORTLISTED FOR THE 2017 FORTNUM MASON FOOD BOOK OF THE YEAR A BBC RADIO 4 FOOD PROGRAMME BOOK OF THE YEAR 2016 A GUARDIAN BOOK OF THE YEAR 2016 We should all know exactly where our meat comes from But what if you took this modern day maxim to its logical conclusion and only ate animals you killed yourself Louise Gray decides to be an ethical carnivore and learn to stalk shoot and fish Starting small Louise shucks oysters and catches a trout As she begins to reconnect with nature she befriends countrymen and women who can teach her to shoot pigeons rabbits and red deer Louise begins to look into how meat is processed including the beef in our burgers cheap chicken supermarket bacon and farmed fish She investigates halal slaughter and visits abattoirs to ask whether new technology can make eating meat more humane Delving into alternative food cultures Louise finds herself sourcing roadkill and cooking a squirrel stir fry and she explores eating other sources of protein like in vitro meat insects and plant based options With the global demand for meat growing Louise argues that eating less meat should be an essential part of fighting climate change for all of us Her writing on nature food and the environment is full of humour while never shying from the hard facts Louise gets to the heart of modern anxieties about where our meat comes from asking an important question for our time is it possible to be an ethical carnivore
