Carlo Ierna, Hanne Jacobs, Filip Mattens, 2011-02-01 The present volume contains many of the papers presented at a four day conference held by the Husserl Archives in Leuven in April 2009 to commemorate the one hundred and fiftieth anniversary of Edmund Husserl's birth. The conference was organized to facilitate the critical evaluation of Husserl's philosophical project from various perspectives and in light of the current philosophical and scientific climate. Still today the characteristic tension between Husserl's concrete and detailed descriptions of consciousness on the one hand and his radical philosophical claim to ultimate truth and certainty in thinking, feeling and acting on the other calls for a sustained reflection on the relation between a Husserlian phenomenological philosophy and philosophy in general. What can phenomenological reflection contribute to the ongoing discussion of certain perennial philosophical questions and which philosophical problems are raised by a phenomenological philosophy itself? In addition to addressing the question of the relation between phenomenology and philosophy in general, phenomenology today cannot avoid addressing the nature of its relation to the methods and results of the natural and human sciences. In fact for Husserl phenomenology is not just one among many philosophical methods and entirely unrelated to the sciences. Rather according to Husserl phenomenology should be a first philosophy and should aim to become the standard for all true science. **L'Esprit Créateur**, 1994 Mystery and Secrecy in the Nag Hammadi Collection and Other Ancient Literature: Ideas and Practices Christian H. Bull, Liv Lied, John D. Turner, 2011-10-28 Mystery and secrecy were central concepts in the ritual rhetoric and sociological stratification of antique Mediterranean religions. That the ultimate nature and workings of the divine were secret and either could not or should not be revealed except as a mystery for the initiated was widely accepted among Pagans, Jews and then Christians both Gnostic and otherwise. The similarities and differences in the language of mystery and secrecy across religious and cultural borders are thus crucial for understanding this important period of the history of religions. The present anthology aims to present and analyze a wide selection of sources elucidating this theme reflecting the correspondingly wide scholarly interests of Professor Einar Thomassen in honor of his 60th birthday. **Library of the University of California** University of California, Berkeley.
