introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include Night Vision Study and Photogrammetry Vehicle Event Data Recorders Motorcycle Heavy Vehicle Bicycle and Pedestrian Accident Reconstruction. The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction, appealing to crash analysts, consultants, and safety engineers alike.

Political Economy of Malaysia's Industrial Policy Firdausi Suffian, 2021-02-22. This book examines the national automotive policy in Malaysia to help readers gain an understanding of the country's industrial policy-making processes. Addressing a gap in analysis of the political economy of the national automotive policy, the research presented combines the new institutional theory and the developmental state approach to provide new insights into elite policymakers' measures to shield domestic automotive enterprises from pro-market reforms. The formation of the national car project marks a turning point for Malaysia's industrial development as a country which it envisions will lead to it becoming a major player in the global automotive market. However, the domestic institutional factors embedded in ethno-economic interests and patronage constrain national car makers, limiting their potential to grow and instead causing a slowdown in the industry. Allowing readers to understand the background to Malaysia's heavy industrialisation programme and the birth of its national car projects, this book critically discusses the significance of institutional context in policy outcomes and highlights how institutions and policies have impacted growth or decline. It is a valuable resource relevant to analysts, researchers, and students who are interested in the political economy of the national industrial policy and automotive industry in Malaysia and beyond.
