Engaged Leadership Joan Marques, Satinder Dhiman, 2018-05-02 This professional book examines the concept of engaged leadership. Specifically, it focuses on the need for leaders in personal and professional realms for profit and non-profit to understand the importance of engagement in order to achieve enhanced satisfaction and motivation among stakeholders including employees, shareholders, investors, supporters, customers, suppliers, the community, competitors, family, and partners, and hence an augmented level of designed thinking which leads to increased innovation and on-going leadership development. Divided into three sections: engaged leadership development at the personal level, implementation at the organizational level, and manifestation in practice, this book provides professionals, practitioners, and policy makers as well as students with the tools and skills to lead actively and conscientiously and help them understand the importance of creativity and compassion for development. Engaged leadership operates on the fundamental principle that leaders have to first and foremost perceive themselves as leaders and then engage in design thinking as they will need to develop strategies to reach, encourage, and positively appeal to these stakeholder groups. Leadership is neither limited to those holding formal managerial positions nor to any particular setting. Leaders can be found everywhere in all layers of society. Leadership is only possible, however, if one dares to perceive and define oneself as a leader. And only when leadership is adopted as a reality within one's personal perception can engaged leadership be applied. Featuring contributions from academics, scholars, and professionals from around the world, each providing cases, interactive questions, and reflective notes, this book will be of interest to professionals, practitioners, policy makers, students, and scholars interested in creative leadership, management, organizational behavior, and governance.

Holistic Leadership Satinder Dhiman, 2017-01-11 This book suggests that the solution to the current leadership crisis lies in leaders' self-cultivation process emanating from their deepest values and culminating in their contribution to the common good. Traditional approaches to leadership rarely provide any permeating or systematic framework to garner a sense of higher purpose or nurture deeper moral and spiritual dimensions of leaders. Learning to be an effective leader requires a level of personal transformation on the continuum of self, spirit, and service. Synthesizing the best of contemporary approaches to leadership in a holistic manner, this book presents a unique model of leadership that is built on the sound principles of Self-Motivation, Personal Mastery, Creativity, and Flow, Emotional Intelligence, Optimal Performance, Appreciative Inquiry, Authentic Leadership, Transformational Leadership, Positive Psychology, Moral Philosophy, and Wisdom Traditions of the world. This broad interdisciplinary approach is well suited to effectively address the multifaceted issues faced by contemporary organizations and leaders. It will be of great interest to graduate business and organizational leadership students and faculty as well as corporate leaders.
