Statistical Applications for Chemistry, Manufacturing and Controls (CMC) in the Pharmaceutical Industry Richard K. Burdick, David J. LeBlond, Lori B. Pfahler, Jorge Quiroz, Leslie Sidor, Kimberly Vukovsky, Lanju Zhang, 2017-02-14 This book examines statistical techniques that are critically important to Chemistry Manufacturing and Control CMC activities Statistical methods are presented with a focus on applications unique to the CMC in the pharmaceutical industry The target audience consists of statisticians and other scientists who are responsible for performing statistical analyses within a CMC environment Basic statistical concepts are addressed in Chapter 2 followed by applications to specific topics related to development and manufacturing The mathematical level assumes an elementary understanding of statistical methods The ability to use Excel or statistical packages such as Minitab JMP SAS or R will provide more value to the reader The motivation for this book came from an American Association of Pharmaceutical Scientists AAPS short course on statistical methods applied to CMC applications presented by four of the authors One of the course participants asked us for a good reference book and the only book recommended was written over 20 years ago by Chow and Liu 1995 We agreed that a more

recent book would serve a need in our industry Since we began this project an edited book has been published on the same topic by Zhang 2016 The chapters in Zhang discuss statistical methods for CMC as well as drug discovery and nonclinical development We believe our book complements Zhang by providing more detailed statistical analyses and examples
