High-skilled Migration Mathias Czaika, 2018 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers

An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these. Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful. Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed. The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic, social and political drivers of migration which may be equally or sometimes even more important than migration policies per se. A better understanding of migration policies, their making, consequences and limitations requires a systematic knowledge of the broader economic, social and political structures and their interaction in both origin and destination countries. This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual, city, national and international level.

South Africa Survey, 2003 *Psychological Assessment in South Africa* Sumaya Laher, Kate Cockcroft, 2013-01-01

This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners.

A Bold Profession Leslie Anne Hadfield, 2021-05-11

In rural South African clinics Black nurses were charged with administering life saving health care measures despite a lack of equipment and personnel often while navigating the intersections of traditional African healing practices and changing gender relations. *A Bold Profession* is an homage to their dedication to the well being of their communities.

engagement with the planning process Development Planning in South Africa is an empirically rich study that utilises a strategic relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state The first work of its kind the book provides an indispensable micro level study with profound implications for how state power is understood to be organised and expressed in state policy Relevant beyond South Africa to policy implementation in both developing and developed states globally the book is essential reading for students and scholars of government studies political economy development policy studies and social movements *South Africa News Update* ,1993 Consists of reproductions of articles from South African newspapers

Decentralization and Recentralization in the Developing World J. Tyler Dickovick,2011-01-01 In the 1980s and 1990s much of the developing world experienced transitions to democracy accompanied by economic liberalization and decentralization of power to subnational governmental bodies The process of decentralization has been studied intensively but little attention has been paid so far to the recentralization that has occurred in some countries in the past decade In this book J Tyler Dickovick seeks to illuminate how the processes of decentralization and recentralization are interrelated and what the dynamics of each is He argues that decentralization occurs as a result of the decline in the power of the presidency whereas recentralization occurs when the president resolves an extraordinary economic crisis The processes of decentralization and recentralization Dickovick further argues have the same dynamics whether they occur in federal or unitary states To test the theory Dickovick compares a strong federal system Brazil with a weak one South Africa and compares these in turn with two unitary regimes Peru and Senegal Decentralization and Recentralization in the Developing World provides a much more nuanced understanding of when and why decentralization and recentralization happen and what their importance is to intergovernmental shifts in power

Sizwe's Test Jonny Steinberg,2008-02-12 At the age of twenty nine Sizwe Magadla is among the most handsome well educated and richest of the men in his poverty stricken village Dr Hermann Reuter a son of old South West African stock wants to show the world that if you provide decent treatment people will come and get it no matter their circumstances Sizwe and Hermann live at the epicenter of the greatest plague of our times the African AIDS epidemic In South Africa alone nearly 6 million people in a population of 46 million are HIV positive Already Sizwe has watched several neighbors grow ill and die yet he himself has pushed AIDS to the margins of his life and associates it obliquely with other people s envy with comeuppance and with misfortune When Hermann Reuter establishes an antiretroviral treatment program in Sizwe s district and Sizwe discovers that close family members have the virus the antagonism between these two figures from very different worlds one afraid that people will turn their backs on medical care the other fearful of the advent of a world in which respect for traditional ways has been lost and privacy has been obliterated mirrors a continent wide battle against an epidemic that has corrupted souls as much as bodies A heartbreaking tale of shame and pride sex and death and a continent s battle with its demons Steinberg s searing account is a tour de force of
