The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Ferenc Laczó, Joachim von Puttkamer, 2020-08-02 Intellectual Horizons offers a pioneering transnational and comparative treatment of key thematic areas in the intellectual and cultural history of Central and Eastern Europe in the twentieth century For most of the twentieth century Central and Eastern European ideas and cultures constituted an integral part of wider European trends However the intellectual and cultural history of this diverse region has rarely been incorporated sufficiently into nominally comprehensive histories of Europe This volume redresses this underrepresentation and provides a more balanced perspective on the recent past of the continent through original critical overviews of themes

ranging from the social and conceptual history of intellectuals and histories of political thought and historiography to literary visual and religious cultures to perceptions and representations of the region in the twentieth century While structured thematically individual contributions are organized chronologically They emphasize where relevant generational experiences agendas and accomplishments while taking into account the sharp ruptures that characterize the period The third in a four volume set on Central and Eastern Europe in the twentieth century it is the go to resource for understanding the intellectual and cultural history of this dynamic region *Locating Science Fiction* Andrew Milner,2012 A major groundbreaking intervention into contemporary theoretical debates about SF It effects a series of vital shifts in SF theory and criticism away from prescriptively abstract dialectics of cognition and estrangement and towards the empirically grounded understanding of an amalgam of texts practices and artefacts **Hitler and Czechoslovakia in World War II** Patrick Crowhurst,2013-10-24 The invasion of Czechoslovakia by Nazi Germany in March 1939 helped to precipitate Europe s descent into World War II six months later The move supposedly to protect the Sudeten Germans shocked many in Europe who saw it as a clear statement of intent by Hitler Here Patrick Crowhurst argues that occupation of the Sudetenland and the Czech lands was also crucial to the Nazi war machine The armaments factories and raw materials that Hitler seized accelerated Germany s capabilities Czech tanks would prove crucial in the Ardennes and as the Wehrmacht fought at Stalingrad Armaments Minister Albert Speer was corraling Czech industrial machinery to produce engines aircraft and equipment in support In addition new Slovakian and Czech primary material are used to give a new in depth account of the German reaction to the assassination of Reinhardt Heydrich on the streets of Prague in June 1942 The recriminations were brutal and dovetailed with Hitler s plans for the genocide of Czech Jewry This is a new side of the History of Nazi Europe and argues for the centrality of the Czech occupation in the overall narrative of World War II **The Silenced Theatre** Marketa Goetz-Stankiewicz,1979-12-15 Since the Soviet occupation of 1968 censorship has closed the curtain on free expression in Czechoslovakia But plays continue to be circulated in typescript within the country are regularly smuggled out for publication abroad and continue to be produced without restriction in the West This book is the first full length study of Czechoslovak drama of the sixties and seventies The author discusses the works of major playwrights including Vclav Havel Pavel Kohout and Josef Topol and the influence of the great Czech writers Kafka and Haek as well as Western writers such as Beckett Sartre and Albee Czech and Slovak playwrights have responded in a distinctive courageous and often very funny manner to a political situation perhaps best labelled absurd The author depicts movingly their portrait of the horror and the unintended humour of life in a rigidly bureaucratic society a theme of universal interest The Silenced Theatre is the only detailed study of this dynamic and modern national theatre This book will help to preserve Czech drama and create an awareness of its important role in Western literature a role it continues to play even in exile from its homeland **Polish Jewish Re-Remembering** Slawomir Jacek Żurek,2023-11-14 The title of this monograph Polish Jewish Re Remembering refers to the post 1989 thirty year long process

of reviving attention to Polish Jewish relations in historical cultural and literary studies including the impact of Jews on the development of Polish culture their presence in Polish social life and the relationships between Jews and non Jews in Poland The book consists of four parts the first focuses on Polish Jewish and Polish Jewish Literature dealing mainly with pre 1939 literary works the second on the post war literary output of the Polish Jewish writer Arnold S ucki 1920 1972 the third on Polish Israeli literary images in the works of writers who were active in Israel 1948 2018 and the fourth on recent after 2000 Polish Holocaust literature

Maritime Governance and Policy-Making Michael Roe, 2012-07-20 A close analysis of the framework of existing governance and the existing jurisdictional arrangements for shipping and ports reveals that while policy making is characterized by national considerations through flags institutional representation at all jurisdictions and the inviolability of the state the commercial financial legal and operational environment of the sector is almost wholly global This governance mismatch means that in practice the maritime industry can avoid policies which it dislikes by trading nations off against one another while enjoying the freedoms and benefits of a globalized economy A Post modern interpretation of this globalized society prompts suggestions for change in maritime policy making so that the governance of the sector better matches more closely the environment in which shipping and ports operate Maritime Governance and Policy Making is a controversial commentary on the record of policy making in the maritime sector and assesses whether the reason for continued policy failure rests with the inadequate governance of the sector Maritime Governance and Policy Making addresses fundamental questions of governance jurisdiction and policy and applies them to the maritime sector This makes it of much more interest to a much wider audience including students researchers government officials and those with industrial and commercial interests in the shipping and ports areas and also of more value as it places the specific maritime issues into their wider context Maritime Governance and Policy Making addresses fundamental questions of governance jurisdiction and policy and applies them to the maritime sector This makes it of much more interest to a much wider audience including students researchers government officials and those with industrial and commercial interests in the shipping and ports areas and also of more value as it places the specific maritime issues into their wider context

Secularization without End Vincent P. Pecora, 2015-03-15 In *Secularization without End* Beckett Mann Coetzee Vincent P Pecora elaborates an alternative history of the twentieth century Western novel that explains the resurgence of Christian theological ideas Standard accounts of secularization in the novel assume the gradual disappearance of religious themes through processes typically described as rationalization philosophy and science replace faith Pecora shows however that in the modern novels he examines secularization ceases to mean emancipation from the prescientific ignorance or enchantment commonly associated with belief and signifies instead the shameful state of a humanity bereft of grace and undeserving of redemption His book focuses on the unpredictable and paradoxical rediscovery of theological perspectives in otherwise secular novels after 1945 The narratives he analyzes are all seemingly godless in their overt points of view from Samuel Beckett s *Murphy* to Thomas Mann s *Doktor Faustus* to J M Coetzee s *The Childhood of Jesus* But Pecora argues these novels wind up producing varieties of religious doctrine drawn from Augustinian and Calvinist claims about primordial guilt and the impotence of human will In the most artfully imaginative ways possible Beckett Mann and Coetzee resist the apparently inevitable plot that so many others have constructed for the history of the novel by which human existence is reduced to mundane and meaningless routines and nothing more Instead their writing invokes a religious past that turns secular modernity and the novel itself inside out
