

PHET Introduction to Waves, Part II: Sound

ANSWER KEY and TEACHING NOTES

Go to the Phet website at <https://phet.colorado.edu/en/simulation/waves-intro> and choose the Sound simulation.

SETUP

Also attach your wave meter and drag one probe into the wave-viewing area.

Click on *Both Particles and Waves* so you can watch how both vary.

ANALYSIS

1. Explore the sound simulation as you change the amplitude and frequency. Look for patterns and relationships. **No answer needed!**
2. Do the particles move in the same direction as the wave or perpendicular to the motion of the wave? What do we call this kind of a wave? (transverse or longitudinal?) **Same direction, longitudinal. Be careful that they might confuse this with a water wave which is a special case, not a pure longitudinal wave. Basically the water particles move in 2-dimensional circles while sound waves merely oscillate back-and-forth.**
3. Freeze and observe: are the particles closer together or farther apart in the white area of the wave-viewing area? **Farther apart**
4. What is the name for this portion of a wave? **Rarefaction (where the particles are more rare)**
5. Are the particles closer together or farther apart in the dark area of the wave-viewing area? **Closer**
6. What is the name for this portion of a wave? **Compression**
7. Follow one red dot as the waves cross it. After a number of waves have crossed it what happens to its net displacement? **There is no net displacement, they keep coming back.**
8. Do the particles ever move permanently across the field of view? If the particles are not moving, what is moving? **No, energy**
9. The graph is a graph of kinetic energy. How would you describe the difference between the energy at a peak and the energy at a trough? **The amount of energy is the same but the direction is opposite.**

Sound Murray Answer Key:

Sound Design Theory and Practice Leo Murray, 2019-05-22 Sound Design Theory and Practice is a comprehensive and accessible guide to the concepts which underpin the creative decisions that inform the creation of sound design. A fundamental problem facing anyone wishing to practice, study, teach or research about sound is the lack of a theoretical language to describe the way sound is used and a comprehensive and rigorous overarching framework that describes all forms of sound. With the recent growth of interest in sound studies, there is an urgent need to provide scholarly resources that can be used to inform both the practice and analysis of sound. Using a range of examples from classic and contemporary cinema, television and games, this book provides a thorough theoretical foundation for the artistic practice of sound design, which is too frequently seen as a technical or secondary part of the production process. Engaging with practices in film, television and other digital media, Sound Design Theory and Practice provides a set of tools for systematic analysis of sound for both practitioners and scholars.

The Oxford Handbook of Sound and Imagination, Volume 1 Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkergaard, 2019-07-26 Whether social, cultural or individual, the act of imagination always derives from a pre-existing context. For example, we can conjure an alien's scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train. This process is no less true for the role of imagination in sonic events and artifacts. Many existing works on sonic imagination tend to discuss musical imagination through terms like compositional creativity or performance technique. In this two-volume Handbook, contributors shift the focus of imagination away from the visual by addressing the topic of sonic imagination and expanding the field beyond musical compositional creativity and performance technique into other aural arenas where the imagination holds similar power. Topics covered include auditory imagery and the neurology of sonic imagination, aural hallucination and illusion, use of metaphor in the recording studio, the projection of acoustic imagination in architectural design and the design of sound artifacts for cinema and computer games.

The Sound Handbook Tim Crook, 2013-06-17 Tim Crook has written an important and much-needed book, and its arrival on our shelves has come at a highly appropriate time. Professor Sean Street, Bournemouth University, says: 'The Sound Handbook maps theoretical and practical connections between the creation and study of sound across the multi-media spectrum of film, radio, music, sound art, websites, animation and computer games, entertainment and stage theatre. Using an interdisciplinary approach, Tim Crook explores the technologies, philosophies and cultural issues involved in making and experiencing sound, investigating soundscape debates and providing both intellectual and creative production information. The book covers the history, theory and practice of sound and includes practical production projects and a glossary of key terms. The Sound Handbook is supported by a companion website signposted throughout the book with further practical and theoretical resources dedicated to bridging the creation and study of sound across professional platforms and academic disciplines.'

Pronouncing Dictionary of the English Language ... P. Austin Nuttall, James Henry Murray, 1892 *Sound, Media, Ecology* Milena Droumeva, Randolph Jordan, 2019-06-27 This volume reads the global urban environment through mediated sonic practices to put a contemporary spin on acoustic ecology's investigations at the intersection of space, cultures, technology and the senses. Acoustic ecology is an interdisciplinary framework from the 1970s for documenting, analyzing and transforming sonic environments; an early model of the cross-boundary thinking and multi-modal practices now common across the digital humanities. With the recent emergence of sound studies and the expansion of ecological thinking, there is an increased urgency to re-discover and contemporize the acoustic ecology tradition. This book serves as a comprehensive investigation into the ways in which current scholars working with sound are re-inventing acoustic ecology across diverse fields, drawing on acoustic ecology's focus on sensory experience, place and applied research as well as attendance to mediated practices in sounded space. From sounding out the Anthropocene to rethinking our auditory media landscapes to exploring citizenship and community, this volume brings the original acoustic ecology problem set into the contemporary landscape of sound studies.

Media, Sound, and Culture in Latin America and the Caribbean Alejandra Bronfman, Andrew Grant Wood, 2012-04-22 Outside of music, the importance of sound and listening have been greatly overlooked in Latin American history. Visual media has dominated cultural studies, affording an incomplete record of the modern era. This edited volume presents an original analysis of the role of sound in Latin American and Caribbean societies from the late nineteenth century to the present. The contributors examine the importance of sound in the purveyance of power, gender roles, race, community, religion and populism. They also demonstrate how sound is essential to the formation of citizenship and nationalism. Sonic media and radio, in particular, have become primary tools for contesting political issues. In that vein, the contributors view the control of radio transmission and those who manipulate its content for political gain. Conversely, they show how, in neoliberal climates, radio programs have exposed corruption and provided a voice for activism. The chapters address sonic production in a variety of media: radio, Internet, digital recordings, phonographs, speeches, carnival performances, fireworks, festivals and the reinterpretation of sound in literature. They examine the embodied experience of listening and its importance to memory, coding and identity formation. This collection looks to sonic media as an essential vehicle for transmitting ideologies, imagined communities and culture. As the contributors discern, sound is ubiquitous and its study is therefore crucial to understanding the flow of information and influence in Latin America and globally.
