Teaching Students How to Use Self-Management

Margaret E. King Sears, 2019-03-22 Self management is a robust technique whereby students of all ages and ability levels learn how to control their learning and social behaviors. When students effectively self manage, teachers spend more time on instruction and less time reminding students how to behave, which benefits teachers and students. Additionally, students learn independence when they self manage. This guide presents a 10 step instructional sequence for teaching students three types of self management: self monitoring, self evaluation, and self reinforcement. Each type can be taught to a whole class, small groups, or individual students, grades K-12. Any type can be used with both learning and social behaviors. Through this simple 10 step process, students learn what self management is, why to use it, how to apply it, and when to use it. Instruction includes role playing, modeling, and demonstrating mastery during guided practice and in the actual setting. Instruction takes about one hour, spread across multiple sessions. After instruction, follow up is necessary to reinforce students' use of self management and confirm that accurate self management occurs.
