Problematizing the Foreign Shop Vanya Gastrow, 2018-08-03 Small businesses owned by international migrants and refugees are often the target of xenophobic hostility and attack in South Africa This report examines the problematization of migrant owned businesses in South Africa and the regulatory efforts aimed at curtailing their economic activities In so doing it sheds light on the complex ways in which xenophobic fears are generated and manifested in the country's social legal and political orders Efforts to curb migrant spaza shops in South Africa have included informal trade agreements at local levels fining migrant shops and legislation that prohibits asylum seekers from operating businesses in the country Several of these interventions have overlooked the content of local by laws and outdated legal frameworks The report concludes that when South African township residents attack migrant spaza shops they are expressing their dissatisfaction with their socio economic conditions to an apprehensive state and political leadership In response governance actors turn on migrant shops to demonstrate their allegiance to these residents to appease South African spaza shopkeepers and to tacitly blame socio economic malaise on perceived foreign forces Overall these actors do not have spaza shops primarily in mind when calling for the stricter regulation of these businesses Instead they are concerned about the volatile support of their key political constituencies and how this backing can be undermined or generated by the symbolic gesture of regulating the foreign shop

**The Political Economy of Mental Illness in South Africa** André J van Rensburg, 2021-02-17 The book describes key socio political reforms that helped shape post apartheid South Africa s mental health system The author interrogates how reforms shaped public community based services for people living with severe mental illness and how features of this care has been determined in part at least by the relations between actors and structures in the state private for profit health care and civil society spheres A description of the development of South Africa s post apartheid health system and the contentions that emerge therein sets the stage for an analysis of the country s most tragic human rights failure during its democratic period namely the Life Esidimeni tragedy The roots of the tragedy are not only framed as a loss of life and dignity as a result of political corruption and administrative mismanagement but as a power differential that ultimately highlights an unjust system that relegates its most vulnerable citizens to commodities without voice and without agency The book concludes that the commodification of severe mental illness has been a product of neoliberal discourses that have shaped the economic ways in which the post apartheid South African state have governed poverty and severe mental illness This book will be of interest to scholars of health social and economic policy in South Africa

Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness

in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility

**Greening the South African Economy** Mark Swilling, Josephine Kaviti Musango, Jeremy Wakeford, 2016-02-23 The depletion of South Africa's and in some cases the world's natural resources and the degradation of environmental sinks including the atmosphere lakes and rivers and land are continuing at such a rate that natural resource prices are climbing and many critical ecosystem services that underpin human welfare are increasingly threatened The concept of the green economy has gained increasing traction in South African policy discourses over the past few years However in much of this discourse it is viewed in a piecemeal way as one part or sector of the economy e.g. an industrial sector dealing with manufacture and installation of renewable energy technologies and energy efficient equipment and appliances In the view of the authors greening the South African economy requires an application of sustainability principles and practices across the full range of primary secondary and tertiary sectors of the economy in an integrated manner The aim of this book is therefore to apply principles of sustainability and green economics to the entire South African socio economic system and its major elements in an integrated and comprehensive manner

*Media in Postapartheid South Africa* Sean Jacobs,2019-03-11 In *Media in Postapartheid South Africa* author Sean Jacobs turns to media politics and the consumption of media as a way to understand recent political developments in South Africa and their relations with the African continent and the world Jacobs looks at how mass media define the physical and human geography of the society and what it means for comprehending changing notions of citizenship in postapartheid South Africa Jacobs claims that the media have unprecedented control over the distribution of public goods rights claims and South Africa s integration into the global political economy in ways that were impossible under the state controlled media that dominated the apartheid years Jacobs takes a probing look at television commercials and the representation of South Africans reality television shows and South African continental expansion soap operas and postapartheid identity politics and the internet as a space for reassertions and reconfigurations of identity As South Africa becomes more integrated into the global economy Jacobs argues that local media have more weight in shaping how consumers view these products in unexpected and consequential ways
