Informality and the City Gregory Marinic,Pablo Meninato,2022-10-03 This book advances the agenda of informality as a transnational phenomenon recognizing that contemporary urban and regional challenges need to be addressed at both local and global levels This project may be considered a call for action Its urgency derives from the impact of the pandemic combined with the effects of climate change in informal settlements around the world While the notion of the informal is usually associated with the analysis and interventions in informal settlements this book expands the concept of informality to acknowledge its

interdisciplinary parameters The book is geographically organized into five sections The first part provides a conceptual overview of the notion of the informal serving as an introduction and reflection on the subject The following sections are dedicated to the principal regions of the Global South Latin America US Mexico Borderlands Asia and Africa while considering the interconnections and correspondences between urbanism in the Global South and the Global North This book offers a critical introduction to groundbreaking theories and design practices of informality in the built environment It provides essential reading for scholars professionals and students in urban studies architecture city planning urban geography sociology anthropology cultural studies economics and the arts As a critical survey of informality the book examines history theory and production across a range of informal practices and phenomena in urbanism architecture activism and participatory design Authored by a diverse and international cohort of leading educators theorists and practitioners 45 chapters refine and expand the discourse surrounding informal cities

Design for the Changing Educational Landscape Andrew Harrison, Les Hutton, 2013-10-15 The whole landscape of space use is undergoing a radical transformation In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide the rise of distributed space In the learning environment the social political economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching and a wide acceptance of the importance of learning as the core of the community resulting in the blending of all aspects of learning into one seamless experience This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces real and virtual that now accommodate the experience of learning and provide pointers towards the creation and design of learning centred communities Part 1 looks at the entire learning universe as it now stands tracks the way in which its constituent parts came to occupy their role assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform It shows that what is required is innovation within the spaces and integration between them Part 2 finds many examples of innovation in evidence across the world in schools the higher and further education campus and in business and cultural spaces but an almost total absence of integration Part 3 offers a model that redefines the learning landscape in terms of learning outcomes mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale By encouraging stakeholders to creating an events based rather than space based identity the book hopes to point the way to a fully integrated learning landscape a learning community

Hybrid Urbanism Nezar AlSayyad, 2001-03-30 Despite strong forces toward globalization much of late 20th century urbanism demonstrates a movement toward cultural differentiation Such factors as ethnicity and religious and cultural heritages have led to the concept of hybridity as a shaper of identity Challenging the common assumption that hybrid peoples create hybrid places and hybrid places house hybrid people this book suggests that hybrid environments do not always accommodate pluralistic tendencies or multicultural practices In

contrast to the standard position that hybrid space results from the merger of two cultures the book introduces the concept of a third place and argues for a more sophisticated understanding of the principal In contributed chapters the book provides case studies of the third place enabling a comparative and transnational examination of the complexity of hybridity The book is divided into two parts Part one deals with pre 20th century examples of places that capture the intersection of modernity and hybridity Part two considers equivalent sites in the late 20th century demonstrating how hybridity has been a central feature of globalization

Geographies, Mobilities, and Rhythms over the Life-Course Elaine Stratford, 2014-11-20 By thinking in terms of the geographies of mobilities we are better able to understand the central importance of movements rhythms and shifting emplacements over the life course This innovative book represents research from a new and flourishing multidisciplinary field that includes among other things studies on smart cities infrastructures and networks mobile technologies for automated highways or locative media mobility justice and rights to stay or enter or reside These activities cadences and changing attachments to place have profound effects first upon how we conduct or govern ourselves and each other via many social institutions and second upon how we constitute the spaces in and through which our lives are experienced This scholarship also has clear connections to numerous aspects of social and spatial policy and planning

Experience Design Peter Benz, 2014-12-18 How can we design better experiences Experience Design brings together leading international scholars to provide a cross section of critical thinking and professional practice within this emerging field Contributors writing from theoretical empirical and applied design perspectives address the meaning of experience draw on case studies to explore ways in which specific experiences can be designed examine which methodologies and practices are employed in this process and consider how experience design interrelates with other academic and professional disciplines Chapters are grouped into thematic sections addressing positions objectives and environments and interactions and performances with individual case studies addressing a wide range of experiences including urban spaces the hospital patient museum visitors mobile phone users and music festival and restaurant goers

Sustainable Urban Neighbourhood David Rudlin, Nicholas Falk, 2010-05-14 This successful title previously known as Building the 21st Century Home and now in its second edition explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban neighbourhood as a model for rebuilding urban areas The book reviews the way that planning policies architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures The authors suggest that these trends point to a very different urban future The authors argue that we must reform our towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban Neighbourhood is a model for such reform and the book describes what this

would look like and how it might be brought about **Urban Theory** Mark Jayne, Kevin Ward, 2016-10-04 Urban Theory New Critical Perspectives provides an introduction to innovative critical contributions to the field of urban studies Chapters offer easily accessible and digestible reviews and as a reference text Urban Theory is a comprehensive and integrated primer which covers topics necessary for a full understanding of recent theoretical engagements with cities The introduction outlines the development of urban theory over the past two hundred years and discusses significant theoretical methodological and empirical challenges facing the field of urban studies in the context of an increasing globally inter connected world The chapters explore twenty four topics which are new additions to the urban theoretical debate highlighting their relationship to long established concerns that continue to have intellectual purchase and which also engage with rich new and emerging avenues for debate Each chapter considers the genealogy of the topic at hand and also includes case studies which explain key terms or provide empirical examples to guide the reader to a better understanding of how theory adds to our understanding of the complexities of urban life This book offers a critical and assessable introduction to original and groundbreaking urban theory and will be essential reading for undergraduate and postgraduate students in human geography sociology anthropology cultural studies economics planning political science and urban studies
