have placed self interest above the collective good This is not merely a mental health crisis Loneliness increases our risk of heart disease cancer and dementia Statistically it s as bad for our health as smoking fifteen cigarettes a day It s also an economic crisis costing us billions annually And it s a political crisis as feelings of marginalization fuel divisiveness and extremism around the world But it s also a crisis we have the power to solve Combining a decade of research with firsthand reporting Noreena Hertz takes us from a how to read a face class at an Ivy League university to isolated remote workers in London during lockdown from renting a friend in Manhattan to nursing home residents knitting bonnets for their robot caregivers in Japan Offering bold solutions ranging from compassionate AI to innovative models for urban living to new ways of reinvigorating our neighborhoods and reconciling our differences The Lonely Century offers a hopeful and empowering vision for how to heal our fractured communities and restore connection in our lives

**Public Space and the Ideology of Place in American Culture** Miles Orvell,Jeffrey L. Meikle,2009 We typically take public space for granted as if it has continuously been there yet public space has always been the expression of the will of some agency person or institution who names the space gives it purpose and monitors its existence And often its use has been contested These new essays written for this volume approach public space through several key questions Who has the right to define public space How do such places generate and sustain symbolic meaning Is public space unchanging or is it subject to our subjective perception Do we given the public nature of public space have the right to subvert it These eighteen essays including several case studies offer convincing evidence of a spatial turn in American studies They argue for a re visioning of American culture as a history of place making and the instantiation of meaning in structures boundaries and spatial configurations Chronologically the subjects range from Pierre L Enfant s initial majestic conceptualization of Washington D C to the post modern realization that public space in the U S is increasingly a matter of waste Topics range from parks to cities to small towns from open air museums to airports encompassing the commercial marketing of place as well as the subversion and re possession of public space by the disenfranchised Ultimately public space is variously imagined as the site of social and political contestation and of aesthetic change
