The Death and Resurrection of a Coherent Literature Curriculum Sandra Stotsky, 2012-06-16 This book is addressed to teachers who know that the secondary literature curriculum in our public schools is in shambles Unless experienced and well read English teachers can develop coherent and increasingly demanding literature curricula in their schools average high school students will remain at about the fifth or sixth grade reading level where they now are to judge from several independent sources This book seeks to challenge education policy makers test developers and educators who discourage the assignment of appropriately difficult works to high school students and make construction of a coherent literature curriculum impossible It first traces the history of the literature curriculum in our middle schools and high schools and shows how it has been diminished and distorted in the past half century It then offers examples of coherent literature curricula and spells out the cognitive principles upon which coherence is based Finally it suggests what English teachers in our public schools could do to develop a literature curriculum that gives all their students an adequate basis for participation in an English speaking civic culture

Human Capital Over the Life Cycle Catherine Sofer, 2004-01-01 I am convinced that it should occupy a high position on the desk of policymakers This book constitutes a good state of the art study in this field and paves the way for further research in this direction

Marie Claire Villevall Economic Record This attractive publication is carried out as a clear attempt to gain access to a wider audience relaxing formal and technical details which makes the lecture easier An international comparison of literature or educational and labour experiences is provided in every contribution in the book helping to obtain a wider perspective of the problems tackled

Carmen Garc a and Julio Lopez Education Economics This book makes a novel contribution to economics of education in several key respects It highlights a broad number of crucial factors over the individual's life cycle that underlie inequalities in education and in the labour market It is amazing how limited our knowledge is about these interactions despite their high priority in national as well as EU level policy making This is a timely book concerned with topics of high policy relevance Moreover the authors have well succeeded in their attempt to write in a style that makes this work accessible to a wider audience using the editor's words It is most important that academics as well as politicians are made aware of the considerable knowledge gaps that still prevail in our understanding of the role of education and training for the individual's success or failure in school and in working life

Rita Asplund The Research Institute of the Finnish Economy ETLA Finland In the last decade changes occurring in the demand for skills have produced significant effect on the functioning of labour markets in Europe and elsewhere The challenge posed by a knowledge based society for sustained growth has been at the centre of the European strategy for employment and has important implications for the design of labour market policies This book brings together a wide range of contributions written by leading experts on key issues such as schooling systems transition from school to work and lifelong learning thereby providing an essential reference for both researchers and policymakers

Claudio Lucifora Universit Cattolica Italy Human Capital Over the Life

Cycle synthesises comparative research on the processes of human capital formation in the areas of education and training in Europe in relation to the labour market. The book proposes that one of the most important challenges faced by Europe today is to understand the link between education and training on the one hand and economic and social inequality on the other. The authors focus the analysis on three main aspects of the links between education and social inequality: educational inequality, differences in access to labour markets and differences in lifelong earnings and training. Almost all the stages in the life cycle are tracked from early childhood to stages late in the working life: firstly the characteristics and effects of schooling systems, then the transitions from school to work and finally human capital and the working career. Academics and researchers of European studies, labour economics and the economics of education will all find this novel and analytically sound book of interest, as will sociologists and policymakers in Europe.

Critical Literacy with Adolescent English Language Learners Jennifer Alford, 2021-05-24. This book examines critical literacy within language and literacy learning with a particular focus on English as an Additional Language learners in schools who traditionally are not given the same exposure to critical literacy as native English speakers. An important and innovative addition to extant literature, this book explains how English language teachers understand critical literacy and enact it in classrooms with adolescent English language learners from highly diverse language backgrounds. This book brings together the study of two intersecting phenomena: how critical literacy is constructed in English language education policy for adolescent English language learners internationally, and how critical literacy is understood and enacted by teachers amid the so-called literacy crisis in neoliberal eduscapes. The work traces the ways critical literacy has been represented in English language education policy for adolescents in five contexts: Australia, England, Sweden, Canada, and the United States. Drawing on case study research, it provides a comparative analysis of how policy in these countries constructs critical literacy and how this then positions critical engagement as a focus for teachers of English language learners. Empirically based and accessibly written, this timely book will be of interest to a wide range of academics in the fields of adolescent literacy education, English language learning and teaching, education policy analysis, and critical discourse studies. It will also appeal to teachers, postgraduate students, and language education policy makers.

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02. South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English, and to a much lesser extent Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to

bring the innovative solutions designed by South African educators to a wider international audience ICT in Education in Global Context Ronghuai Huang, Kinshuk, Jon K. Price, 2015-11-05 This book aims to capture the current innovation and emerging trends of digital technologies for learning and education in K-12 sector through a number of invited chapters in key research areas Emerging Patterns of innovative instruction in different context Learning design for digital natives Digital learning resources for personalized learning in both formal and informal educational settings e leadership and teacher's digital capacity will be covered in the book This book intends to provide reference for the innovation in K-12 schools Researchers policy makers school administrators and also teachers could benefit from this book on researchers and methods for innovation in K-12 schools all over the world *Beyond the Bubble Test* Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what's possible at the local and state levels Linda Darling-Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U.S. borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us IJER Vol 12-N2 International Journal of Educational Reform, 2002-12-24 The mission of the International Journal of Educational Reform IJER is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities As the only peer reviewed scholarly publication that combines authors voices without regard for the political affiliations perspectives or research methodologies IJER provides readers with a balanced view of all sides of the political and educational mainstream To this end IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration curriculum instruction law and research IJER should thus be of interest to professional educators with decision making roles and policymakers at all levels turn since it provides a broad based

conversation between and among policymakers practitioners and academicians about reform goals objectives and methods for success throughout the world Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes Finally it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U S and the world
