Starting Out with C++ Tony Gaddis, Judy Walters, Godfrey Muganda, 2013-02-22 When Maps Become the World
Rasmus Grønfeldt Winther, 2020-06-29 Map making and ultimately map thinking is ubiquitous across literature cosmology mathematics psychology and genetics We partition summarize organize and clarify our world via spatialized representations Our maps and more generally our representations seduce and persuade they build and destroy They are the ultimate record of empires and of our evolving comprehension of our world This book is about the promises and perils of map thinking Maps are purpose driven abstractions discarding detail to highlight only particular features of a territory By preserving certain features at the expense of others they can be used to reinforce a privileged position When Maps Become the World shows us how the scientific theories models and concepts we use to intervene in the world function as maps and explores the consequences of this both good and bad We increasingly understand the world around us in terms of models to the extent that we often take the models for reality Winther explains how in time our historical representations in science in cartography and in our stories about ourselves replace individual memories and become dominant social narratives they become reality and they can remake the world *Starting Out with C++* Tony Gaddis, 2008 **Victorian Sensation** James A. Secord, 2024-05-31 Fiction or philosophy profound knowledge or shocking heresy When *Vestiges of the Natural History of Creation* was published anonymously in 1844 it sparked one of the greatest sensations of the Victorian era More than a hundred thousand readers were spellbound by its startling vision an account of the world that extended from the formation of the solar system to the spiritual destiny of humanity As gripping as a popular novel *Vestiges* combined all the current scientific theories in fields ranging from astronomy and geology to psychology and economics The book was banned it was damned it was hailed as the gospel for a new age This is where our own public controversies about evolution began In a pioneering cultural history James A Secord uses the story of *Vestiges* to create a panoramic portrait of life in the early industrial era from the perspective of its readers We join apprentices in a factory town as they debate the consequences of an evolutionary ancestry We listen as Prince Albert reads aloud to Queen Victoria from a book that preachers denounced as blasphemy vomited from the mouth of Satan And we watch as Charles Darwin turns its pages in the flea ridden British Museum library fearful for the fate of his own unpublished theory of evolution Using secret letters Secord reveals how *Vestiges* was written and how the anonymity of its author was maintained for forty years He also takes us behind the scenes to a bustling world of publishers printers and booksellers to show how the furor over the book reflected the emerging industrial economy of print Beautifully written and based on painstaking research *Victorian Sensation* offers a new approach to literary history the history of reading and the history of science Profusely illustrated and full of fascinating stories it is the most comprehensive account of the making and reception of a book other than the Bible ever attempted Winner of the 2002 Pfizer Award from the History of Science Society **Penn State Law Review** ,1902 Dictionary of National Biography
