Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. Automotive Lubricants Reference Book Arthur J. Caines, Roger F. Haycock, John E. Hillier,2004 The automotive lubricants arena has undergone significant changes since the first edition of this book was

published in 1996 Environmental concerns particularly regarding improvement of air quality have been important in recent years. Reduced emissions are directly related to changes in lubricant specifications and quality and the second edition of the Automotive Lubricants Reference Book reflects the urgency of such matters by including updated and expanded detail. This second edition also considers the recent phenomenon of increased consolidation within the oil and petroleum additive arenas which has resulted in fewer people for research development and implementation along with fewer competing companies. After reviewing the first edition the authors have fully reviewed and updated the information to fit in with the changes in technology and markets. Chapters include Introduction and Fundamentals, Constituents of Modern Lubricants, Crankcase Oil Testing, Crankcase Oil Quality Levels and Formulations, Practical Experiences with Lubricant Problems, Performance Levels, Classification, Specification and Approval of Engine Lubricants, Other Lubricants for Road Vehicles, Other Specialized Oils of Interest, Blending, Storage, Purchase and Use, Safety, Health and the Environment, The Future.

Automotive Engineering, 1997 Globalization or Regionalization of the American and Asian Car Industry? M. Freyssenet, K. Shimizu, G. Volpato, 2003-04-15. The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms' internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.
