Disability, Intersectionality, and Belonging in Special Education Elizabeth A. Harkins Monaco, L. Lynn Stansberry Brusnahan, Marcus C. Fuller, Martin O. Odima Jr., 2024-02-23 *Disability Intersectionality and Belonging in Special Education* focuses on preparing educators who use socioculturally sustaining practices curricula and instruction through an intersectional lens This book empowers preservice students and special education practitioners and administrators to meet the needs of disabled individuals Understanding the full range of requirements relating to socioculturally sustaining practices is imperative to working with individuals with disabilities as well as with their families and caregivers Being able to understand and explain this complex issue to others is important and often necessary Social injustices in special education are historical and systemic Special education practitioners are typically unaware of the importance of intersectional differences because they have been prepared to address cultural perspectives only during awareness days or through specific units in curricula At other times they discuss the topic diagnostically for example as part of an educational plan or when teaching English as a second language Other issues stem from the value system of the special education practitioners themselves some are not willing to engage in these concepts while others prioritize treating all students the same by using the terms fairness equity and colorblindness to justify this treatment Even when special educator practitioners attempt to address injustices on behalf of their students they tend to center on only the student's disability which means they are ignoring or erasing other aspects of their students' identities These concerns highlight the importance of building the sociocultural competence of our teaching force This book will help practitioners build this competence in their own spheres of influence

[Integration of Wireless Sensor Networks in Pervasive Computing Scenarios](#) Matthias

Gauger,2010 Using wireless sensor networks as part of pervasive computing scenarios is a difficult problem It involves providing functionality and node behavior required by pervasive computing applications given the very limited capabilities and the constraints of wireless sensor nodes The goal of this work is to investigate the problem of integrating wireless sensor nodes and wireless sensor networks in pervasive computing scenarios and to develop solutions that facilitate such an integration Based on an analysis of both research areas of their specific properties and requirements as well as the similarities and differences of the two fields we identify and discuss a set of five fundamental problem areas that complicate the integration of sensor networks and pervasive computing communication network setup and configuration user experience security and flexibility and adaptability In the main part of this work we then introduce a total of six solution approaches that deal with different aspects of the identified problem areas *Global Strategy and Practice of E-Governance: Examples from Around the World* Piaggese, Danilo,Sund, Kristian,Castelnovo, Walter,2011-04-30 Over the past decade there has been continual development and renewal of strategies and practices surrounding e governance Governments around the world have embraced new information and communication technologies to increase the efficiency of internal processes deliver better and more integrated services to citizens and businesses invite citizen and stakeholder participation in planning decisions improve communication and sometimes even enhance democratic processes Global Strategy and Practice of E Governance Examples from Around the World provides readers with an overview of relevant strategy and policy level theoretical frameworks and examples as well as up to date implementations from around the world This book offers valuable insights into best practices as well as some of the issues and challenges surrounding the governance of and with information and communication technologies in a globalized knowledge based world Building Digital Government Strategies Rodrigo Sandoval-Almazán,Luis F. Luna-Reyes,Dolores E. Luna-Reyes,J. Ramon Gil-Garcia,Gabriel Puron-Cid,Sergio Picazo-Vela,2017-08-01 This book provides key strategic principles and best practices to guide the design and implementation of digital government strategies It provides a series of recommendations and findings to think about IT applications in government as a platform for information services and collaboration and strategies to avoid identified pitfalls Digital government research suggests that information technologies have the potential to generate immense public value and transform the relationships between governments citizens businesses and other stakeholders However developing innovative and high impact solutions for citizens hinges on the development of strategic institutional organizational and technical capabilities Thus far particular characteristics and problems of the public sector organization promote the development of poorly integrated and difficult to maintain applications For example governments maintain separate applications for open data transparency and public services leading to duplication of efforts and a waste of resources The costs associated with maintaining such sets of poorly integrated systems may limit the use of resources to future projects and innovation This book provides best practices and recommendations based on extensive research in both Mexico and the United States on how

governments can develop a digital government strategy for creating public value how to finance digital innovation in the public sector how to building successful collaboration networks and foster citizen engagement and how to correctly implement open government projects and open data It will be of interest to researchers practitioners students and public sector IT professionals that work in the design and implementation of technology based projects and programs **Hate Crimes** Barbara Krasner,2017-07-15 Few would argue that a violent attack motivated by negative feelings towards the victim's race ethnicity religion or sexual orientation is a hate crime But should a hate motivated crime be punished differently than the same crime committed for a different motive What if the crime is verbal a slur or a ranting blog post or a graffiti scrawl These may be hateful but are they hate crimes And how should they be punished Are hate crimes on the rise or are media attention and greater sensitivity to the issue making it appear so These and other questions are at the center of this thought provoking collection of articles drawn from across the political spectrum and the globe
