16th International Symposium on Advanced Vehicle Control

Giampiero Mastinu, Francesco Braghin, Federico Cheli, Matteo Corno, Sergio M. Savaresi, 2024-10-03 This open access book highlights the latest advances innovations and applications in the field of vehicle systems dynamics and control as presented by leading international researchers at the 16th JSAE International Symposium on Advanced Vehicle Control AVEC held at Politecnico di Milano Milan Italy on September 2 6 2024 It covers a diverse range of topics such as vehicle dynamics theory steering brake tire suspension chassis control powertrain electrified vehicles stability enhancement systems driver vehicle systems advanced driver assistance systems and automated driving systems driving simulator dynamics and control The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists

Stream Data Mining: Algorithms and Their Probabilistic Properties Leszek Rutkowski, Maciej Jaworski, Piotr Duda, 2019-03-16 This book presents a unique approach to stream data mining Unlike the vast majority of previous approaches which are largely based on heuristics it highlights methods and algorithms that are mathematically justified First it describes how to adapt static decision trees to accommodate data streams in this regard new splitting criteria are developed to guarantee that they are asymptotically equivalent to the classical batch tree Moreover new decision trees are designed leading to the original concept of hybrid trees In turn nonparametric techniques based on Parzen kernels and orthogonal series are employed to address concept drift in the problem of non stationary regressions and classification in a time varying environment Lastly an extremely challenging problem that involves designing ensembles and automatically choosing their sizes is described and solved Given its scope the book is intended for a professional audience of researchers and practitioners who deal with stream data e g in telecommunication banking and sensor networks

Modern Business Process Automation Arthur H. M. ter Hofstede, Wil M. P. van der Aalst, Michael Adams, Nick Russell, 2009-11-18 The field of Business Process Management BPM is marred by a seemingly endless sequence of proposed industry standards Contrary to other fields e.g. civil or electronic engineering these standards are not the result of a widely supported consolidation of well understood and well established concepts and practices In the BPM domain it is frequently the case that BPM vendors opportunistically become involved in the creation of proposed standards to exert or maintain their influence and interests in the field Despite the initial fervor associated with such standardization activities it is no less frequent that vendors either choose to drop their support for standards that they earlier championed on an opportunistic basis or elect only to partially support them in their commercial offerings Moreover the results of the standardization processes themselves are a concern BPM standards tend to deal with complex concepts yet they are never properly defined and all too often not informed by established research The result is a plethora of languages and tools with no consensus on concepts and their implementation They also fail to provide clear direction in the way in which BPM standards should evolve One can also observe a dichotomy between the business side of BPM and its technical side While it is clear that the application of BPM will fail if not placed in a proper business context it is equally clear that its application will go nowhere if it remains merely a motivational exercise with schemas of business processes hanging on the wall gathering dust

Systems Engineering and Artificial Intelligence William F. Lawless, Ranjeev Mittu, Donald A. Sofge, Thomas Shortell, Thomas A. McDermott, 2021-11-02 This book provides a broad overview of the benefits from a Systems Engineering design philosophy in architecting complex systems composed of artificial intelligence AI machine learning ML and humans situated in chaotic environments The major topics include emergence verification and validation of systems using AI ML and human systems integration to develop robust and effective human machine teams where the machines may have varying degrees of autonomy due to the sophistication of their embedded AI ML The chapters not only describe what has been learned but also raise questions that must be answered to further advance the general Science of Autonomy The science of how humans and machines operate as a team requires insights from among others disciplines such as the social sciences national and international jurisprudence ethics and policy and sociology and psychology The social sciences inform how context is constructed how trust is affected when humans and machines depend upon each other and how human machine teams need a shared language of explanation National and international jurisprudence determine legal responsibilities of non trivial human machine failures ethical standards shape global policy and sociology provides a basis for understanding team norms across cultures Insights from psychology may help us to understand the negative impact on humans if AI ML based machines begin to outperform their

human teammates and consequently diminish their value or importance This book invites professionals and the curious alike to witness a new frontier open as the Science of Autonomy emerges Signal Processing, Telecommunication & Embedded Systems: AI and ML Applications Vikrant Bhateja,Zaid Omar,Anumoy Ghosh,Sarika Shrivastava,2025-11-01 The book discusses the latest developments and outlines future trends in the fields of microelectronics electromagnetics and telecommunication It contains original research works presented at the International Conference on Microelectronics Electromagnetics and Telecommunication ICMEET 2024 organized by Department of Electronics and Communication Engineering National Institute of Technology Mizoram India during 19 20 December 2024 The book is divided into four volumes and it covers papers written by scientists research scholars and practitioners from leading universities engineering colleges and R D institutes from all over the world and shares the latest breakthroughs in and promising solutions to the most important issues facing today s society *Proceedings of the Third SIAM International Conference on Data Mining* Daniel Barbara,Chandrika Kamath,2003-01-01 The third SIAM International Conference on Data Mining provided an open forum for the presentation discussion and development of innovative algorithms software and theories for data mining applications and data intensive computation This volume includes 21 research papers
