Essays on Neuroscience and Political Theory F. Vander Valk, 2013-03-01 The past 20 years have seen increasingly bold claims emanating from the field of neuroscience Advances in medical imaging brain modelling and interdisciplinary cognitive science have forced us to reconsider the nature of social cultural and political activities This collection of essays is the first to explore the relationship between neuroscience and political theory with a view to examining what connections can be made and which claims represent a bridge too far The book is divided into three parts Part I places neuroscience as a social and political practice into historical context Part II weaves together the insights from contemporary neuroscience with the wisdom of major figures in the history of political thought Part III considers how neuroscience can inform contemporary debates about a range of issues in political theory This work brings together scholars who are sceptical about the possibility of integrating neuroscience and political theory with proponents of a neuroscience informed approach to thinking about political and social life The result is a timely and wide ranging collection of essays about the role that our brain might play in the life of the body politic It should be essential reading for all those with an interest in the cutting edge of political theory

the organization of society What are the relationships between social equality freedom and democracy To what extent does centralization destroy the capacity for local initiative and self governance What conditions are needed to nurture the flourishing of self governing communities What safeguards are needed to preserve freedom and to prevent incipient democracies from becoming dictatorships Why has democracy had such a problem taking hold in many parts of the non western world How should one study democracy in non western settings Tocquevillian analytics can help us provide answers Addressed to a wider audience than Tocqueville scholars the book argues that Tocquevillian analytics can be used to understand developments in non western as well as western societies and be updated to address such issues as globalization ethnicity New World Old World comparisons and East West dynamics The first part of the book examines the basic components of Tocquevillian analytics outlining its stepwise interdisciplinary approach to understanding societies and nations The second part applies the Tocquevillian conceptual framework to the contemporary world and contains individual chapters on various regions of the world North America Russia Western Europe Asia Africa and Latin America Unlike previous collective works on Tocqueville *Conversations with Tocqueville* does not offer a survey of the authors views but instead focuses on presenting a cohesive *Partnerships with Business and the Community*, 2001 *A Child's Journey* Julius Segal, Herbert C.
