Wilson, 2017-04-06 Orwell was wrong Sports are not war without the shooting nor are they war by other means To be sure sports have generated animosity throughout human history but they also require rules to which the participants agree to abide before the contest Among other things those rules are supposed to limit violence even death More than anything else sports have been a significant part of a historical civilizing process They are the opposite of war As the historical profession has taken its cultural turn over the last few decades scholars have turned their attention to subject once seen as marginal As researchers have come to understand the centrality of the human body in human history they have come to study this most corporeal of human activities Taking early cues from physical educators and kinesiologists historians have been exploring sports in all their forms in order to help us answer the most fundamental questions to which scholars have devoted their lives We have now seen a veritable explosion excellent work on this subject just as sports have assumed an even greater share of a globalizing world's cultural political and economic space Practiced by millions and watched by billions sports provide an enormous share of content on the Internet This volume combines the efforts of sports historians with essays by historians whose careers have been devoted to more traditional topics We want to show how sports have evolved from ancient societies to the world we inhabit today Our goal is to introduce those from outside this sub field to this burgeoning body of scholarship At the same time we hope here to show those who may want to study sport with rigor and nuance how to embark on a rewarding journey and tackle profound matters that have affected and will affect all of humankind *International Sport: A Bibliography, 1995-1999* Richard William Cox, 2004-04-22 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the

late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new

Jackson, David L. Andrews, 2025-02-07 This book explores the intersection of contemporary sport advertising promotional culture and wider society Arguing that advertising and promotional culture remain key driving forces in relation to social structures and systems that contribute to enduring patterns of economic and other forms of inequality this book examines how sport and related areas of social life continue to be transformed by these forces Presenting in depth international case studies covering topics such as Nike's sign economies the sports gambling media complex sportswashing greenwashing radical politics in sport advertising sport and corporate nationalism and girls empowerment and transgender exclusion in sports this book sheds critical new light on some of the most important themes in the study of global consumer culture in the emerging era of surveillance capitalism Overall this book examines sport advertising through the lens of the circuit of cultural commodification including production representation consumption and regulation in order to provide insights into the formation complexities and contradictions of social identities commodities and brands This is fascinating reading for anybody with an interest in the sociology culture and politics of sport or cultural studies media studies and the wider politics and social significance of late stage capitalism *Sport, Race and Ethnicity* Katie Liston, Paddy Dolan, 2017-10-02 Analyses of racialisation processes within and beyond sport would be incomplete without a consideration of ethnicity and ethnic identities Why Because ethnicity as a concept and as a focus for research captures better the diverse experiences of social groups and the scope of belonging Ethnic identities contribute to the way race and racism is constructed and experienced in sport and to the ways in which racial ideologies are created recreated and contested Readers will find here a stimulating array of papers that capture varied aspects of the sport race and ethnicity nexus around the world The journey stretches as far afield as Australia New Zealand Canada Ghana and the USA and in so doing it draws on a range of disciplinary approaches that converge or diverge by degrees Such diversity is to be welcomed in an academic field characterized increasingly by the potential richness of people's experiences of sport race and ethnicity within various cultural contexts Included here are papers from a range of disciplines and approaches including sociology politics sports feminisms critical race theory a strengths perspective Kaupapa Māori Theory history and sports development This book was published as a special issue of *Sport and Society* *Rethinking Drug Use in Sport* Bob Stewart, Aaron Smith, 2014-01-10 Drug free sport is an unattainable aspiration In this critical paradigm shifting reappraisal of contemporary drug policy in sport Bob Stewart and Aaron Smith argue that drug use in sport is an inexorable consequence of the nature structure and culture of sport itself By de mythologising and de moralising the assumptions that prop up current drug management controls and re emphasising the importance of the long term well being and civil rights of the athlete they offer a powerful argument for creating a legitimate space for drug use in sport The book offers a broad ranging overview of the

social and commercial pressures impelling drug use and maps the full historical and social extent of the problem With policy analysis at the centre of the discussion the book explores the complete range of social management policy scientific technological and health issues around drugs in sport highlighting the irresolvable tension between the zero tolerance model as advanced by WADA and the harm reduction approach adopted by drug education and treatment agencies While there are no simple solutions as long as drugs use is endemic in wider society the authors argue that a more nuanced and progressive approach is required in order to safeguard and protect the health social liberty and best interests of athletes and sports people as well as the value of sport itself
