Towards an Integrated Information Society Policy in South Africa Leo van Audenhove, 2003 The information society as a concept for post industrial society as well as a framework for organising growth and prosperity has become part of the public and political debate in many countries Since the beginning of the 1990s the concept has become widely used in popular conversation the mass media political discourse and academic debate with many different meanings The term has quickly moved up the political and policy agendas of western and developing countries as it is believed to bring economic growth and social prosperity for all

Digital Nation Anthony G. Wilhelm, 2006-02-17 The long term social benefits of building an inclusive information society a national action plan As our social institutions migrate into cyberspace the digitally disenfranchised face increasing hardships What happens when in search of quick and cheap fixes a government office shuts down and is replaced by a public Web site What happens when a company accepts only online job applications Inevitably those most in need of the services and opportunities offered are further marginalized In Digital Nation Tony Wilhelm shows us how to build a more inclusive information society offering a plan that reaps the benefits offered by the new technology while avoiding the pitfalls of social exclusion Technology he tells us isn't the problem it's the use of technology that can empower or control unite or divide we need to recover the ideas of social justice and fairness that have been lost in the rush

to make things faster and cheaper In Wilhelm s vision of an inclusive digital nation everyone can take advantage of the new technology With everyone part of the information society we can revolutionize the way we educate our citizens deliver healthcare and engage in productive work The result will be increased efficiency and productivity that will lead to long term savings of billions of dollars and an enhanced quality of life as technology expands choice and opportunity We can begin to bring this about by expanding access to computers and making it easier to acquire digital literacy skills To do nothing to turn a blind eye to the promise of an inclusive technology would cost us socially and economically Digital Nation s call for action sets the terms for a new debate on bridging the digital divide The Information Society Robert Hassan,2008-11-03 What are we to make of the information society Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century Some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways But other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before In this book Robert Hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte and from Vincent Mosco to Manuel Castells *The Information Society* is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible *The Information Society as Post-industrial Society* Yoneji Masuda,1981 Society to an information Society *The Early Information Society* Alistair Black,Dave Muddiman,2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In *The Early Information Society* the authors argue for an earlier incarnation of the information age focusing upon the period 1900 1960 In support of this they examine the history and traditions in Britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development *The Early Information Society* offers an historical account which questions the novelty of the current information society It will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society *Governing Telecommunications and the New Information Society in Europe* Jacint Jordana,2002-10-29 offers a fresh look at efforts to manage telecommunications and the emerging information society in Europe _ Communication Booknotes Quarterly European countries have recently been involved in an extremely broad set of regulator Theories of the Information

Gill, 2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one's intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson
