

Toyota/ Lexus uses these Electronic Systems:

All cars and light trucks built for sale in the United States after 1996 are required to be OBD-II compliant. The European Union adopted (directive 98/69/EC) a similar law in 2001 for gasoline-powered vehicles, and in 2003 for cars with diesel engines.

SAE J 2012 (Diagnostic Trouble Codes¹) defines a set of diagnostic trouble codes (DTCs) where industry uniformity has been achieved. DTCs consist of an alpha character followed by four characters.

Bxxxx is reserved for body DTCs

Cxxxx is reserved for chassis DTCs

Uxxxx is reserved for network DTCs (UART the body electronics like door and roof control, air conditioning, and lightning, as well as for the entertainment control).

The second character designates whether the DTCs and a generic SAE DTC or a manufacturer-specific DTC.
