Toward a Psychology of Being Abraham Harold Maslow, 1962 This book is a continuation of my *Motivation and Personality* published in 1954 It was constructed in about the same way that is by doing one piece at a time of the larger theoretical structure It is a predecessor to work yet to be done toward the construction of a comprehensive systematic and empirically based general psychology and philosophy which includes both the depths and the heights of human nature The last chapter is to some extent a program for this future work and serves as a bridge to it It is a first attempt to integrate the health and growth psychology with psychopathology and psychoanalytic dynamics the dynamic with the holistic Becoming with Being good with evil positive with negative Phrased in another way it is an effort to build on the general psychoanalytic base and on the scientific positivistic base of experimental psychology the Eupsychian B psychological and metamotivational superstructure which these two systems lack going beyond their limits It is very difficult I have found to communicate to others my simultaneous respect for and impatience with these two comprehensive psychologies So many people insist on being either pro Freudian or anti Freudian pro scientific psychology or anti scientific psychology etc In my opinion all such loyalty positions are silly Our job is to integrate these various truths into the whole truth which should be our only loyalty

Media,2022-04-05T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The new conception of human sickness and health is based on the assumptions that we have an essential biologically based inner nature that is good or neutral and that it is best to bring this out and encourage it rather than to suppress it 2 The classical approach to personality problems considers them to be problems in an undesirable sense Struggle conflict guilt bad conscience anxiety depression frustration and tension are all symptoms of sick and undesirable people But all of these symptoms are found in healthy people or people who are growing toward health 3 The classical Freudian notion of a superego is entirely authoritarian and relativistic It is the internalization of the wishes demands and ideals of the father and mother whoever they may be But there is also another kind of conscience which is based on the unconscious and preconscious perception of our own nature 4 The question of whether or not it is possible to grow and self fulfill without pain and grief is also important to consider If these are to some extent unavoidable then to what extent If grief and pain are sometimes necessary for growth then we must learn not to protect people from them automatically A Theory of Human Motivation Stoyan Stoyanov,2017 US psychologist Abraham Maslow s A Theory of Human Motivation is a classic of psychological research that helped change the field for good Like many field changing thinkers Maslow was not just a talented researcher he was also a creative thinker able to see things from a new perspective and show them in a different light At a time when psychology was dominated by two major schools of thought Maslow was able to forge a new third paradigm that remains influential today Sigmund Freud s psychoanalysis had developed the idea of understanding the mind through dialogue between patient and analyst The behaviorism of Ivan Pavlov and John Watson had focused on comprehending the mind through behaviors that could be measured trained and changed Maslow however generated new ideas forging what he called positive or humanistic psychology His argument was that humans are psychologically motivated by a series of hierarchical needs starting with the most essential first Maslow thought it important for the advancement of psychology to identify group and rank these needs in terms of priority His belief in the value of this third way was important in leading those who studied psychology to redefine the discipline and so see it in new ways Provided by publisher

Throughout the history of psychology there have been full investigations of discrete emotions particularly negative ones and a recent wealth of books on happiness but few exist on the emotion of joy This book takes a unique psychological approach to understanding this powerful emotion and provides a framework within which the study of human joy and other related positive fulfillment experiences can fit in a meaningful schema A key feature of this book is its development of an experiential phenomenology of joy This phenomenology is based on more than three hundred descriptions of joy experiences recounted by subjects in an empirical study executed by the author Types of joy experiences are examined such as excited vs serene joy anticipatory vs completed joy and affiliative vs individuated joy There is no comparable book or work that clarifies the relationship among major positive states with emotional components including satisfaction happiness and ecstasy

One Nation Under Therapy Christina Hoff Sommers, Sally Satel, 2025-08-22 Americans have traditionally placed great value on self reliance and fortitude In recent decades however we have seen the rise of a therapeutic ethic that views Americans as emotionally underdeveloped psychically frail and requiring the ministrations of mental health professionals to cope with life s vicissitudes Being in touch with one s feelings and freely expressing them have become paramount personal virtues Today with a book for every ailment a counselor for every crisis a lawsuit for every grievance and a TV show for every conceivable problem we are at risk of degrading our native ability to cope with life s challenges Drawing on established science and common sense Christina Hoff Sommers and Dr Sally Satel reveal how therapism and the burgeoning trauma industry have come to pervade our lives Help is offered everywhere under the presumption that we need it in children s classrooms the workplace churches courtrooms the media the military But with all the help comes a host of troubling consequences including The myth of stressed out homework burdened hypercompetitive and depressed or suicidal schoolchildren in need of therapy and medication The loss of moral bearings in our approach to lying crime addiction and other foibles and vices The unasked for grief counselors who descend on bereaved families schools and communities following a tragedy offering dubious advice while billing plenty of money The expansion of Post Traumatic Stress Disorder from an affliction of war veterans to nearly everyone who has experienced a setback Intelligent provocative and wryly amusing One Nation Under Therapy demonstrates that talking about problems is no substitute for confronting them
