Toward A Translation Criticism John Donne:

Toward a Translation Criticism Antoine Berman, 2009 Fran oise Massardier Kenney's translation of Antoine Berman's *Toward a Translation Criticism* makes available for the first time in the English speaking world one of the twentieth century's foundational texts in translation studies. Berman's book, published posthumously in France, develops an original concept of criticism of translation and a methodology to anchor the practice of this criticism. He demonstrates how the work of translation is a critical process as well as a creative one. Moving away from nonsystematic evaluative approaches that focus on the shortcomings of translations or the normative approaches that study the cultural and literary systems into which the translations are inserted, Berman applies the notion of ethics he developed in his earlier works, calling for a translation that is nonethnocentric and stipulating that the creativity required by translation be focused on the re-creation of the original in the other language without being over-determined by the personal poetics of the writer-translator. Berman achieves a rare combination of hermeneutic and stylistic analysis of commentary on the original and analysis of its translations, giving the reader access both to the language of the original to the way in which poetry and thought are deployed and to the actual work of translation. *Toward a Translation Criticism* is divided into two separate but interlinked parts, each focused on one element of the ethics of translation: theory, reflection, and practice; experience. In the first part, Berman presents what he calls a general productive criticism, while in the second part he applies the general theoretical principles of this criticism to the analysis of the translations of John Donne's work into French and Spanish. The translation of Berman's text is accompanied by an introduction placing Berman's thought in its intellectual context and by supplementary notes that complete the bibliographic material presented in the French language version. This study is essential reading for translation studies scholars, readers interested in the creative literary process, in the nature of literary criticism, and in the philosophy of language. It will also be of interest to John Donne specialists.

On Qian Zhongshu's Conceptualization of Translation Chang, Chung-An, 2025-10-14 This book brings new perspectives and insights to the discipline of translation studies at a time when Western theories dominate its main discourse. By highlighting the significant contribution of Chinese scholar Qian Zhongshu, which encompasses a theoretical probing of the process and product of translation in both China and the West, the author demonstrates how Qian's reconceptualization of the concept of translation expands the discourse to include and integrate concepts from the history of translation in China. The concept of *huajing*, which is one of these cultural perspectives developed by Qian, transcends the conventional view of translation as a linguistic transfer, envisioning it instead as a dynamic realm where encounters with meaning between the textual worlds of China and the West can take place. Through a meticulous analysis of Qian's profound though stylistically fragmentary commentaries, the author reveals how his comparative vision creates connections by breaking down linguistic and cultural barriers, challenging notions of untranslatability that often hinder cross-cultural exchange and anticipating an inclusive and globalized understanding of

political sociology **Thomas Mann in English** David Horton, 2013-04-11 Thomas Mann owes his place in world literature to the dissemination of his works through translation. Indeed, it was the monumental success of the original English translations that earned him the title of the greatest living man of letters during his years in American exile 1938-52. This book provides the first systematic exploration of the English versions, illustrating the vicissitudes of literary translation through a principled discussion of a major author. The study illuminates the contexts in which the translations were produced before exploring the transformations Mann's work has undergone in the process of transfer. An exemplary analysis of selected textual dimensions demonstrates the multiplicity of factors which impinge upon literary translation, leading far beyond the traditional preoccupation with issues of equivalence. Thomas Mann in English thus fills a gap both in translation studies where Thomas Mann serves as a constant but ill-defined point of reference and in literary studies which has focused increasingly on the author's wider reception.

Karin Michaëlis' Bibi books Anna Wegener, 2021-02-01 Karin Michaëlis 1872-1950 was one of the most important Danish authors of the early 20th century and achieved enormous international success with her Bibi books about the life and adventures of a free-spirited Danish girl named Bibi. The series was not particularly popular in the author's native country; however, this book unravels the intricate reasons behind the strikingly asymmetrical reception of the Bibi series at home and abroad while at the same time deconstructing this homeabroad dichotomy by showing that the Bibi books are an example of transnational children's literature. They did not have their home in Denmark; in that Karin Michaëlis wrote them specifically for foreign publishers, first and foremost the German Herbert Stuffer. The book further argues that the Danish texts are rewritings rather than originals and explores some of the salient textual features of the Danish and German Bibi books. Finally, it examines the series' reception by young Italian readers in Fascist Italy and Karin Michaëlis' Italian translator.
