Friendship and Social Interaction Valerian J. Derlega,Barbara A. Winstead,2012-12-06 A neglected topic in the field of personal relationships has been the study of friendships Social psychologists have studied how and why individuals are attracted to one another and the processes of interaction during initial encounters but they have not paid much attention to ongoing friend ships A major goal of the present volume is to develop theories and integrate research on the development and maintenance of friendships Another major goal is to build bridges between social psychologists and other social

scientists by presenting an interdisciplinary approach Although a majority of the contributors are social psychologists other authors include sociologists as well as developmental personality and clinical psychologists The chapters also present research on friendship based on a wide range of research methodologies including laboratory research as well as longitudinal naturalistic and clinical studies Hence the book incorporates a variety of conceptual and methodological approaches that should contribute to a cross fertilization of ideas among disciplines The first chapter by Barbara A Winstead and Valerian J Derlega provides an overview of theory and research on friendship The second chapter by Daniel Perlman and Beverley Fehr provides a summary and conceptual critique of social psychological theories of social attraction that are relevant to the study of friendship Adopting a developmental approach Duane Buhrmester and Wyndol Furman in Chapter 3 demonstrate the particular importance of friendship during middle childhood and adolescence in fulfilling interpersonal needs
