After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

Postwar Laura McEnaney, 2018-09-07 When World War II ended Americans celebrated a military victory abroad but the meaning of peace at home was yet to be defined From roughly 1943 onward building a postwar society became the new national project and every interest group involved in the war effort from business leaders to working class renters held different visions for the war's aftermath In *Postwar* Laura McEnaney plumbs the depths of this period to explore exactly what peace meant to a

broad swath of civilians including apartment dwellers single women and housewives newly freed Japanese American internees African American migrants and returning veterans In her fine grained social history of postwar Chicago McEnaney puts ordinary working class people at the center of her investigation What she finds is a working class war liberalism a conviction that the wartime state had taken things from people and that the postwar era was about reclaiming those things with the state s help McEnaney examines vernacular understandings of the state exploring how people perceived and experienced government in their lives For Chicago s working class residents the state was not clearly delineated The local offices of federal agencies along with organizations such as the Travelers Aid Society and other neighborhood welfare groups all became what she calls the state in the neighborhood an extension of government to serve an urban working class recovering from war Just as they had made war the urban working class had to make peace and their requests for help large and small constituted early dialogues about the role of the state during peacetime Postwar examines peace as its own complex historical process a passage from conflict to postconflict that contained human struggles and policy dilemmas that would shape later decades as fatefully as had the war

The Meritocracy Trap Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also

knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people The Middle and Upper Paleolithic Archeology of the Levant and Beyond Yoshihiro Nishiaki,Takeru Akazawa,2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia **The History of the Study of Landforms or the Development of Geomorphology, Volume 5** T.P. implications of biomedicine demand interdisciplinary efforts integrating both the social and natural sciences In this context the question of whether a given knowledge practice is too disciplinary or interdisciplinary or not disciplinary enough has become an issue for governments research policy makers and funding agencies Interdisciplinarity in short has emerged as a key political preoccupation yet the term tends to obscure as much as illuminate the diverse practices gathered under its rubric This volume offers a new approach to theorising interdisciplinarity showing how the boundaries between the social and natural sciences are being reconfigured It examines the current preoccupation with interdisciplinarity notably the ascendance of a particular discourse in which it is associated with a transformation in the relations between science technology and society Contributors address attempts to promote collaboration between on the one hand the natural sciences and engineering and on the other the social sciences arts and humanities From ethnography in the IT industry to science and technology studies environmental science to medical humanities cybernetics to art science the collection interrogates how interdisciplinarity has come to be seen as a solution not only to enhancing relations between science and society but the pursuit of accountability and the need to foster innovation Interdisciplinarity is essential reading for scholars students and policy makers across the social sciences arts and humanities including anthropology geography sociology science and technology studies and cultural studies as well as all those engaged in interdisciplinary research It will have particular relevance for those concerned with the knowledge economy science policy environmental politics applied anthropology ELSI research medical humanities and art science

Scenarios and Responses to Future Deep Oil Spills Steven A. Murawski, Cameron H.

Ainsworth, Sherryl Gilbert, David J. Hollander, Claire B. Paris, Michael Schlüter, Dana L. Wetzel, 2019-07-04 It has often been said that generals prepare for the next war by re-fighting the last. The Deepwater Horizon DWH oil spill was unlike any previous underwater well blowout 1 500 meters deep. Much has been learned in the wake of DWH and these lessons should in turn be applied to both similar oil spill scenarios and those arising from frontier explorations by the marine oil industry. The next deep oil well blowout may be at 3 000 meters or even deeper. This volume summarizes regional Gulf of Mexico and global megatrends in marine oil exploration and production. Research in a number of key areas including the behavior of oil and gas under extreme pressure, impacts on biological resources of the deep sea and the fate of oil and gas released in spills is synthesized. A number of deep oil spills are simulated with detailed computer models and the likely effects of the spills and potential mitigation measures used to combat them are compared. Recommended changes in policies governing marine oil exploration and development are proposed as well as additional research to close critical and emerging knowledge gaps. This volume synthesizes state of the art research in deep oil spill behavior and response. It is thus relevant for government and industry oil spill responders, policy formulators and implementers and academics and students desiring an in-depth and balanced overview of key issues and uncertainties surrounding the quest for deep oil and potential impacts on the environment. *Nuclear Science Abstracts*, 1973 [A Research Agenda for Gentrification](#) Winifred Curran, Leslie Kern, 2023-06-01 Offering a new theoretical framework for understanding gentrification and displacement, this timely Research Agenda focuses on resistance as the central research area in this subject field. Arguing that the future of gentrification research should focus on accomplishing the end of gentrification, chapters provide practical organizing and policy strategies using international case studies which are rooted in community-based research. **The Struggle for Change** Marvin T. Chiles, 2023-12-28 A Black majority city with a history of the most severe segregation and inequity, Richmond is still grappling with this legacy as it moves into the twenty-first century. Marvin Chiles now offers a unique take on Richmond's racial politics since the civil rights era by demonstrating that the city's current racial disparities in economic mobility, housing and public education actually represent the unintended consequences of Richmond's racial reconciliation measures. He deftly weaves municipal politics together with grassroots efforts examining the work and legacies of Richmond's Black leaders from Henry Marsh on the city council in the 1960s to Mayor Levar Stoney to highlight the urban revitalization and public history efforts meant to overcome racial divides after Jim Crow yet which ironically reinforced racial inequality across the city. Compellingly written, this project carries both local and broader regional significance for Richmonders, Virginians, southerners and all Americans. **The Crisis of Israel's Democracy, 1948-2025** Ilan Peleg, Ruth Amir, 2025-07-10 The Crisis of Israel's Democracy 1948-2025: Origins, Developments and Consequences focuses on Israeli democracy, its deep historical origins, development over seven decades, long-term consequences and possible resolutions. While most commentaries on Israel's crisis focus on the proposals for judicial reform by the Netanyahu government, this

study focuses on what it identifies as the fundamental problems of the Israeli regime its ethnonational rather than liberal democratic form its lack of a written constitution undermines the country s deeply divided society the greatly dysfunctional relations between the secular majority and the sizeable Orthodox minority and above all the seemingly permanent occupation of the Palestinian inhabited West Bank Peleg and Amir offer a broad perspective on these causes covering the historical failures of the country s founders an analysis of Israel s constitutional order and regime type commentary on sociopolitical cleavages and the dominant social psychology of Israelis and analysis of the charismatic populism of longtime Israeli prime minister Benjamin Netanyahu The volume concludes with analyzing future scenarios and possible solutions for Israel s democratic crisis The Crisis of Israel s Democracy offers the most comprehensive analysis of Israel s democratic backsliding to date comparing it to similar worldwide processes Federal Register ,2012-06 *Unique World Records 2016* Unique World Records,2016-12-25 **DISCLAIMER** Unique World Records exists for a noble cause The content published here is for reaching out to Potential people for encouraging them to display their hidden talent globally The information provided is unique by our best efforts and may resemble to certain entities due to similar nature of Record Breaking By visiting this site you acknowledge and are bound to agree that your use of this Site and the Services found at this Site including any content will comply with this Agreement that any action relating to or arising out of this Agreement shall be subject to Bathinda Jurisdiction and you hereby consent to and waive all defences of lack of personal jurisdiction and forum non convenience with respect to Bathinda jurisdiction Unique World Records is not obligated to designate world record status to any submission as the decision is based on their belief in supporting evidence and or relevance of their claim Unique World Records policy try to find records that are reproducible breakable and based on skill Freak strange and unusual anomalies are not world records Stunts involving luck or uncontrolled danger should not be submitted *Catalog of Books and Reports in the Bureau of Mines Technical Library, Pittsburgh, Pa* United States.
