Manto,1983 Sabbatai Sevi Gershom Gerhard Scholem,2016-09-20 Gershom Scholem stands out among modern thinkers for the richness and power of his historical imagination A work widely esteemed as his magnum opus Sabbatai evi offers a vividly detailed account of the only messianic movement ever to engulf the entire Jewish world Sabbatai evi was an obscure kabbalist rabbi of seventeenth century Turkey who aroused a fervent following that spread over the Jewish world after he declared himself to be the Messiah The movement suffered a severe blow when evi was forced to convert to Islam but a clandestine sect survived A monumental and revisionary work of Jewish historiography Sabbatai evi details evi s rise to prominence and stands out for its combination of philological and empirical authority and passion This edition contains a new introduction by Yaacob Dweck that explains the scholarly importance of Scholem s work to a new generation of readers

Days of God James Buchan,2013-10-15 A myth busting insider s account of the Iranian Revolution of 1979 that destroyed US influence in the country and transformed the politics of the Middle East and the world The 1979 Islamic revolution in Iran was one of the seminal events of our time It inaugurated more than thirty years of war in the Middle East and fostered an Islamic radicalism that shapes foreign policy in the United States and Europe to this day Drawing on his lifetime of engagement with Iran James Buchan explains the history that gave rise to the Revolution in which Ayatollah Khomeini and his supporters displaced the Shah with little difficulty Mystifyingly to outsiders the people of Iran turned their backs on a successful Westernized government for an amateurish religious regime Buchan dispels myths about the Iranian Revolution and instead assesses the historical forces to which it responded He puts the extremism of the Islamic regime in perspective a truly radical revolution it can be compared to the French or Russian Revolutions Using recently declassified diplomatic papers and Persian language news reports diaries memoirs interviews and theological tracts Buchan illuminates both Khomeini and the Shah His writing is always clear dispassionate and informative The Iranian Revolution was a turning point in modern history and James Buchan s *Days of God* is as London s Independent put it a compelling beautifully written history of that event *Legendary Of Biography* Sarahu Nagarazan,2023-09-10 Lord Sarahu Nagarazan 1st June 1988 was born as a human incarnation to the earth And he has come for the welfare of world What he has suffered in this human incarnation is as follows Beginning with the vicissitude of his Love He did continuously 8 years Dhy na or hypnotism for his first lover Uma In these 8 years last 4 years Suma came into his life and infringed in Dhy na or hypnotism Then he continued Dhy na or hypnotism for Uma After 8 years instead of getting the power of hypnotism he received the grace of illumination on god and world After his matriculation he knocked the door of Kannada film industry There he cheated by film writers directors and

technicians Then at the age of 18 and 20 he worked in 3 movies sandalwood Kannada as writer and assistant director And also worked in some documentary projects At the age of 18 to 33 he written and published 151 novels 5 short stories 1 drama and 30 English Articles And at the age of 26 to 30 he research and published 92 research articles and he received 260 research awards and honorary doctorate awards and at the age of he achieved 1926 new world records and breaking world records He have a deep imagination power at the time he was studying 5th standard The proof for this is the only novels he have written when he was in the 8th 9th and 10th standard But here there is no provision to explain the summary of said novels The scope of my imagination can understand the only those people who have studied his novels because that novels contains the series of imaginations and subjects that the Hollywood films can also take inspiration from this work He can write story screenplay dialogues and scene paper within 4 hours However you demand he can write in that style in Hollywood Example if you give a subject likes stone or stick or any other think or you just show anything around us by pointing finger he can write on the topic story screenplay dialogues and scene paper within 4 hours in a day only by pen or he tell it orally as your wish He can write as you say within 4 hours in a day And he can direct Hollywood movies without a script it s my confidence If you provide an opportunity to write a Hollywood story with any theme he can write it in front of you spontaneously without giving time for thinking Lonely without anybody s help He can write that Hollywood script within fraction of second s right from foundation to climax

Malthus Across Nations Gilbert Faccarello, Masashi Izumo, 2020-04-24 The writings of Thomas Robert Malthus continue to resonate today particularly An Essay on the Principle of Population which was published more than two centuries ago Malthus Across Nations creates a fascinating picture of the circulation of his economic and demographic ideas across different countries highlighting the reception of his works in a variety of nations and cultures This unique book offers not only a fascinating piece of comparative analysis in the history of economic thought but also places some of today s most pressing debates into an accurate historical perspective thereby improving our understanding of them

Hajnal Andr ka and István Németi on Unity of Science Judit Madarász, Gergely Székely, 2021-05-31 This book features more than 20 papers that celebrate the work of Hajnal Andr ka and István Németi It illustrates an interaction between developing and applying mathematical logic The papers offer new results as well as surveys in areas influenced by these two outstanding researchers They also provide details on the after life of some of their initiatives Computer science connects the papers in the first part of the book The second part concentrates on algebraic logic It features a range of papers that hint at the intricate many way connections between logic algebra and

geometry The third part explores novel applications of logic in relativity theory philosophy of logic philosophy of physics and spacetime and methodology of science They include such exciting subjects as time travelling in emergent spacetime The short autobiographies of Hajnal Andr ka and Istv n N meti at the end of the book describe an adventurous journey from electric engineering and Maxwell s equations to a complex system of computer programs for designing Hungary s electric power system to exploring and contributing deep results to Tarskian algebraic logic as the deepest core theory of such questions then on to applications of the results in such exciting new areas as relativity theory in order to rejuvenate logic itself

The Saturday Review of Politics, Literature, Science, Art, and Finance ,1867 *Systems Science and Cybernetics - Volume III* Francisco Parra-Luna, The subject Systems sciences and cybernetics is the outcome of the convergence of a number of trends in a larger current of thought devoted to the growing complexity of primarily social objects and arising in response to the need for globalized treatment of such objects This has been magnified by the proliferation and publication of all manner of quantitative scientific data on such objects advances in the theories on their inter relations the enormous computational capacity provided by IT hardware and software and the critical revisiting of subject object interaction not to mention the urgent need to control the efficiency of complex systems where efficiency is understood to mean the ability to find a solution to many social problems including those posed on a planetary scale The result has been the forging of a new academically consolidated scientific trend going by the name of Systems Theory and Cybernetics with a comprehensive multi disciplinary focus and therefore apt for understanding realities still regarded to be inescapably chaotic This subject entry is subdivided into four sections The first an introduction to systemic theories addresses the historic development of the most commonly used systemic approaches from new concepts such as the so called geometry of thinking or the systemic treatment of non systemic identities to the taxonomic entropic axiological and ethical problems deriving from a general systemic cybernetic conceit Hence the focus in this section is on the historic and philosophical aspects of the subject Moreover it may be asserted today that beyond a shadow of a doubt problems in particular problems deriving from human interaction but in general any problem regardless of its nature must be posed from a systemic perspective for otherwise the obstacles to their solution are insurmountable Reaching such a perspective requires taking at least the following well known steps a statement of the problem from the determinant variables or phenomena b adoption of theoretical models showing the interrelationships among such variables c use of the maximum amount of wherever possible quantitative information available on each d placement of the set of variables in an environment that inevitably pre determines the problem That epistemology would explain the substantial development of the systemic cybernetic approach in recent decades The articles in the second section deal in particular with the different methodological approaches developed when confronting real problems from issues that affect humanity as a whole to minor but specific questions arising in human organizations Certain sub themes are discussed by the various authors always from a didactic

vantage including problem discovery and diagnosis and development of the respective critical theory the design of ad hoc strategies and methodologies the implementation of both qualitative soft system methodologies and formal and quantitative such as the General System Problem Solver or the axiological operational perspective approaches cross disciplinary integration and suitable methods for broaching psychological cultural and socio political dynamisms The third section is devoted to cybernetics in the present dual meaning of the term on the one hand control of the effectiveness of communication and actions and on the other the processes of self production of knowledge through reflection and the relationship between the observing subject and the observed object when the latter is also observer and the former observed Known as second order cybernetics this provides an avenue for rethinking the validity of knowledge such as for instance when viewed through what is known as bipolar feedback processes through which interactions create novelty complexity and diversity Finally the fourth section centres around artificial and computational intelligence addressing sub themes such as neural networks the simulated annealing that ranges from statistical thermodynamics to combinatorial problem solving such as in the explanation of the role of adaptive systems or when discussing the relationship between biological and computational intelligence
