

Scientific Report

Title:

The title should simply introduce what your experiment is about

Example: The role of light in Photosynthesis

Introduction:

- Write a paragraph that gives your readers background information to understand your experiment.
- This includes explaining scientific theories, processes and other related knowledge.

Example:

Photosynthesis is a vital process for life. It occurs when plants intake carbon dioxide, water and light, and results in the production of glucose and water. The light required for photosynthesis is absorbed by chlorophyll, the green pigment of plants, which is contained in the chloroplasts.

The glucose produced through photosynthesis is stored as starch, which is used as an energy source for the plant and its consumers.

The presence of starch in the leaves of a plant indicates that photosynthesis has occurred.

Aim:

- The aim identifies what is going to be tested in the experiment.
- This should be short, concise and clear

Example:

The aim of the experiment is to test whether light is required for photosynthesis to occur.

Hypothesis

- The hypothesis is a prediction of the outcome of the experiment.
- You have to use background information to make an educated prediction.

Example:

It is predicted that photosynthesis will only occur in leaves that are exposed to light and not in leaves that are not exposed to light. This will be indicated by the presence of absence of starch in the leaves

Risk Assessment:

- Identify the hazards associated with the experiment and provide a method to prevent or minimise the risks

Example:

Risk	Assessment
Scissors are sharp and can cause injury	Use scissors correctly Wear closed durable shoes to prevent injury from falling sharp objects
Methylated spirits are highly flammable and can cause burns or fires	Before using methylated spirits, ensure that all ignition sources such as bunsen burners and matches are extinguished.

Write A Science Report:

Writing for Science Robert Goldbort, 2006-01-01 This book encompasses the entire range of writing skills that today's experimental scientist may need to employ. Chapters cover routine forms such as laboratory notes, abstracts and memoranda, dissertations, journal articles and grant proposals. Robert Goldbort discusses how best to approach various writing tasks as well as how to deal with the everyday complexities that may get in the way of ideal practice: difficult collaborators, experiments gone wrong, funding rejections. He underscores the importance of an ethical approach to science and scientific communication and insists on the necessity of full disclosure. How to Write Technical and Scientific Reports Heike Hering, 2025-05-01 How to Write Technical and Scientific Reports This textbook introduces all important and necessary knowledge to create written reports or oral presentations about STEM and engineering topics in a professional and efficient manner. By showing example structures and right/wrong comparisons you will get many practical hints on how to design your own report. The examples are mostly derived from works written by the authors and therefore they often deal with mechanical engineering topics. There are different sections about frequent mistakes in Technical and Scientific Reports, the use of word processors and tools for creating presentations, the design of figures and tables as well as the oral presentation of the Technical or Scientific Report also as a short statement. In this 3rd edition all texts were revised and updated, the sections with references were updated, the glossary and index were expanded and Springer Nature SN Flashcards were added to help you to remember the introduced knowledge and to create Technical and Scientific Reports even more efficiently. Test your knowledge with questions and answers about the book with Springer Nature Flashcards. **How to Write and Publish a Scientific Paper** Robert A Day, Barbara Gastel, 2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals. *Writing Science in the Twenty-First Century - Second Edition* Christopher Thaiss, Ashley Rose Mehlenbacher, 2025-09-04 Good science deserves good sentences, not just correct ones.
