

BOOK REVIEWS: How to write a book review

There are two approaches to book reviewing:

Descriptive reviews give the essential information about a book. This is done with description and exposition, by stating the perceived aims and purposes of the author, and by quoting striking passages from the text.

Critical reviews describe and evaluate the book, in terms of accepted literary and historical standards, and supports this evaluation with evidence from the text. The following pointers are meant to be suggestions for writing a critical review.

Basic requirements

To write a critical review, the reviewer must know two things:

Knowing the work under review: This demands not only attempting to understand the author's purpose and how the component parts of the work contribute to that purpose, but also knowledge of the author: his/her nationality, time period, other works etc.

Requirements of the genre: This means understanding the art form and how it functions. Without such context, the reviewer has no historical or literary standard upon which to base an evaluation.

Reviewing essentials

Description of the book. Sufficient description should be given so that the reader will have some understanding of the author's thoughts. This account is not a summary. It can be woven into the critical remarks.

Discuss the author. Biographical information should be relevant to the subject of the review and enhance the reader's understanding of the work under discussion.

Appraise the book. A review must be a considered judgment that includes:

- a statement of the reviewer's understanding of the author's purpose
- how well the reviewer feels the author's purpose has been achieved
- evidence to support the reviewer's judgement of the author's achievement.

While you read:

- Read the book with care.
- Highlight quotable passages.
- Note your impressions as you read.
- Allow time to assimilate what you read so that the book can be seen in perspective.
- Keep in mind the need for a single impression which must be clear to the reader.
